## CASH GRAIN MARKETS ABOUT UNCHANGED IN QUIET TRADING

Cash grain prices fluctuated within narrow limits during the week ended January 3. Trading was limited by light receipts while export demand, influenced by the dock strike, was slow. Most grain prices started the New Year at a level somewhat above a year ago.

Winter wheat closed unchanged to 1¢ per bushel higher. Domestic demand was slow with some increase in selling by farmers and country elevators. Although export demand was slow there was some interest in buying for future shipment. Reports indicate the 1963 crop continues to make satisfactory growth. Spring wheat markets were firm with prices unchanged to 1¢ higher. Demand was good for the exceptionally small arrivals. Flour business improved. Durum wheat markets were slow with top qualities selling unchanged but lower qualities at wider discounts. White wheat prices were steady with improved domestic and export orders in prospect. Rye gained 2¢ per bushel with some export news and domestic sales reported.

Corn prices were unchanged to as much as 3¢ per bushel higher with demand generally good for light receipts. The oats market was fractionally stronger at Minneapolis with sales limited by light arrivals. Prices declined 1¢ at Chicago. Barley markets were unchanged to 2¢ higher with fair demand for limited offerings. Grain sorghum prices were unchanged at Kansas City but advanced 2¢ per cwt. at Ft. Worth where small amounts of free grain met good demand.

Soybean markets strengthened with prices mostly 1¢ per bushel higher. Demand was good for light producer selling. Flaxseed was steady with sales light.

### Special Features

	<u>Page</u>
Grains - export prices at specified points .....	2
Feed grains - CCC sales against Certificate Pool, December 21 .....	6
Average farm prices, parity and support rates .....	6
Grains - U. S. imports, November .....	7
Wheat and flour - export payment rates .....	7
Feed grains - CCC sales against Certificate Pool, December 28 .....	8

GRAIN PRICES ... at the first of the year generally averaged above a year ago. This reflects a somewhat higher price support rate and somewhat smaller supplies. Hard winter wheat at Kansas City averaged nearly 20¢ per bushel above a year ago while red wheat at Chicago and St. Louis was 5-6¢ higher. Ordinary protein spring wheat prices at Minneapolis were at about last year's level while 15 percent was 10¢ per bushel higher this year. Durum wheat prices at the first of the year were \$1.06 per bushel lower than a year ago due mainly to a complete reversal in supplies. A year ago world and domestic supplies were small while this year near-record crops were reported in most of the producing areas. White wheat prices at Portland at the beginning of the year were 12¢ higher than a year ago. Rye prices at Minneapolis were 9¢ lower than a year ago. Prices of yellow corn at the principal terminals at the first of the year were 8-12¢ per bushel above last year. White corn at Kansas City was 43¢ below a year ago. Oats prices were generally at about last year's level but barley ranged 12-24¢ per bushel below last year. Grain sorghum prices were 8-10¢ higher than a year ago. Due mainly to active export demand, soybean prices at the first of the year were around 6¢ per bushel higher than a year earlier. Flaxseed was 42¢ per bushel below last year due mainly to the larger crop.

CCC CORN SALES ... against the Certificate Pool were less than 9 million bushels for the week ended December 28. This is less than a third of the nearly 30 million sold in the comparable week a year ago. Sales of corn, October through December, totaled 125 million bushels this season as against 271 million the same period last season. Sales of grain sorghum against the Certificate Pool totaled 3.6 million cwt. the week ended December 28. This is well above the 2.4 million sold the comparable week a year earlier. Sales of grain sorghum, July through December, amounted to 67 million this season or sharply above the 48 million cwt. sold in the same period last season.

Grains: Export prices at specified points, January 3, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel.)

Port Markets	WHEAT <u>1/</u>	Grade	Price	Corn	Soybeans	Barley
				No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
Baltimore .....	No. 2 Red Winter		2.30	1.33	2.64	1.28
Gulf .....	No. 1 Hard Winter,

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## GRAIN MARKETS MIXED IN DULL TRADING

Cash grain prices showed a mixed trend during the week ended January 10. The dock strike had a dulling influence on trading.

Winter wheat finished unchanged to 4¢ per bushel lower. Selling by farmers and country elevators picked up slightly. The inability to ship flour to Gulf ports hampered mill demand, and the dock strike slowed export sales. Growing winter wheat crops remained in generally good condition. Spring wheat found ready takers at unchanged to 2¢ higher prices in Minneapolis, but durum was unchanged to 4¢ lower behind slow demand. Flour business was only moderate. White wheat held firm at Portland as farm selling continued rather slow and export trade improved. Rye declined 2¢ at Minneapolis. Weakness stemmed from the lack of export interest.

Corn, influenced by light offerings and good industrial and feeder demand, closed unchanged to 2¢ per bushel higher. Oats weakened with cash prices down 1-4¢, with heavier receipts meeting slow demand. Barley prices were about steady at most markets but finished unchanged to 4¢ lower at Minneapolis. Trading was slow with export interest lagging. Grain sorghum prices held firm, supported by light offerings of "free" stocks.

Soybeans and flaxseed both closed around 2¢ per bushel higher. Country offerings were meager and buyers were forced to raise bids in order to obtain and maintain stocks. Despite the dock strike, some export sales of soybeans were reported made for later delivery. Flaxseed found only fair demand, but there was some interest in "to-arrive" offerings.

FINAL WINTER WHEAT DIVERSION REPORT ... showed that through December 14 farmers had signed up to divert 5,219,140 acres to conserving uses under the special voluntary 1963 wheat program. This is about 30.6 percent of the 17,061,295 acres of allotments or small farm bases on the 324,668 farms signed up in the program. Last year under the mandatory 1962 wheat stabilization program farmers signed up to divert 11,153,822 acres of the 32,424,220 acres of allotments or small farm bases on 696,939 winter wheat farms. Under the 1962 program farmers were not required to divert more than the mandatory 10 percent reduction from allotments to be eligible to participate even though they may have signed to divert acreage above the 10 percent figure. This year, however, farmers who participate must divert all the acreage signed up to be eligible for price support or for acreage diversion or price-support payments. Participating farmers will be eligible for wheat price support at \$2.00 per bushel, national average. Of this, 18¢ per bushel will be an in-kind payment based on the normal production of the farm's acreage for harvest. The remaining \$1.82 per bushel support will be available through loans and purchase agreements.

GRAIN INSPECTIONS FOR EXPORT DURING CALENDAR YEAR 1962 ... totaled almost 1.4 billion bushels -- a new record and 11 percent more than the previous record of 1.2 billion bushels in 1961. Wheat export inspections of 517.7 million bushels in 1962 were 19 percent smaller than in 1961, and comprised only 38 percent of total inspections compared with 52 percent a year earlier. Inspections of corn, totaling 423.3 million bushels, ran almost 46 percent larger than in 1961 and accounted for about 31 percent of the 1962 total compared with 23 percent in 1961. About 39.7 million bushels more grain sorghum, 35.4 million more barley, 28.6 million more soybeans, 10.8 million more oats, and 7.8 million bushels more rye were inspected for export in 1962 than in 1961. However, flaxseed export inspections of 4.1 million bushels were about 8 percent smaller. More than half, or 790 million bushels, of 1962 total grain export inspections were inspected at Gulf ports. This was about 15 percent more than in 1961. Lake port inspections of 235 million bushels were around 44 percent larger. Export inspections of nearly 165 million bushels at Atlantic ports and 163 million at Pacific ports were about 12 percent smaller in 1962 than in 1961. (See details on page 18.)

Grains: Export prices at specified points, January 10, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

## SOYBEANS ADVANCE SHARPLY

Soybean prices chalked up spectacular gains in active trading during the week ended January 17. Most other cash grains followed the upswing and closed firm or slightly higher.

Winter wheat finished 1-3¢ per bushel higher, reflecting for the most part strength in the futures market. Selling by farmers and interior elevators remained slow, but both domestic and export demand was curtailed by the dock strike. Trade concern continued to mount over the lack of snow cover and the freeze damage in a large part of the winter wheat area. Spring wheat edged up 1-2¢ but durum lost 2-3¢ in rather quiet trading at Minneapolis. White wheat, bolstered by a firm holding tendency of producers and active export trade, moved up 1-2¢ at Portland. Rye drew support from news of the small Argentina crop and advanced 4¢ at Minneapolis.

Corn prices closed unchanged to 3¢ per bushel higher as country movement remained slow and light offerings found ready outlets. Oats finished about unchanged in light trading. Barley also showed little or no change. Grain sorghum prices held steady with trading held in check by limited offerings of "free" stocks.

Soybeans advanced 8-11¢ per bushel. Trading shifted to the buying side of the market. Movement of soybeans from the country remained small. Domestic demand was active and export interests were active despite the backup of stocks at port elevators and in barge and railroad yards. Export buying of soybean oil for February shipment to the Mediterranean area confirmed earlier reports of extensive cold weather damage to the Mediterranean olive crop and also had a strengthening influence on spot soybeans. CCC sold 18 million bushels of soybeans between January 2 and 16, and the inventory on January 16 totaled around 16 million bushels. Flaxseed held steady at Minneapolis.

Grains - CCC dispositions .....	7
Feed grains - CCC sales against Certificate Pool .....	8

EXPORT MOVEMENT OF GRAIN ... from the United States has increased steadily during the past five years. Export inspections of wheat, rye, corn, oats, barley, grain sorghum, soybeans, and flaxseed rose from 806 million bushels in 1958 to an all-time high of nearly 1.4 billion bushels in 1962. This represents an increase of about 68 percent, or some 500 million bushels, for the 5-year period.

Percentage-wise, the biggest increase came between 1958 and 1959 -- the year the St. Lawrence Seaway opened. Export inspections of all grains in 1959 totaled almost 973 million bushels, or 20.6 percent more than in 1958. The 1960 total was 11.5 percent higher than in 1959, while export inspections in 1961 showed an increase of 12. percent over 1960. The increase in 1962 was 10.9 percent.

The pattern of grain movement from U. S. ports also has shown considerable change during the past five years. Opening of the St. Lawrence Seaway was the main reason for this change. In 1958 before the Seaway opened, less than 4 percent of total export grain inspections were performed at Lake ports. Atlantic Coast ports accounted for 22.6 percent of the total; Gulf ports, 52.4 percent; and Pacific ports, 21.3 percent. The following year, the percentages of total inspections stood at 14.2 percent for the Lake ports, 17.2 percent for Atlantic ports, 52.5 percent for Gulf ports, and 16.1 percent for Pacific ports. In 1962, Lake ports comprised 17.4 percent of total export inspections; Atlantic ports, 12.2 percent; Gulf ports, 58.4 percent; and Pacific ports, 12 percent.

During the past five years, export inspections of all grains have increased 13.7 percent at Lake ports and 6 percent at Gulf ports but have decreased 10.4 percent at Atlantic ports and 9.3 percent at Pacific ports. Most of the increase in lake port inspections was due naturally to the opening of the Seaway, while development of new export elevators and other facilities helped boost inspections at Gulf ports. Although total inspections have dropped off at Atlantic and Pacific ports, export movement of grains has increased substantially at such ports at Norfolk, Philadelphia, Portland, Ore., and Longview, Washington. (See details in table on page 6.)

Grains: Export prices at specified points, January 17, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## GRAIN PRICES SHOW MIXED TREND

Some cash grain prices were higher but others were lower at the close of the week ending January 24. Trading was on the light side, with interest centering on news concerning the dock strike and the weather.

Winter wheat finished on a firm note. Spot offerings remained light as farmers and interior elevators were holding tightly in anticipation of higher prices following a settlement of the dock strike and resumption of normal export trade. Possible crop damage from prolonged severe winter both in this country and in Europe also was a supporting factor. Spring wheat prices weakened and durum held steady in rather quiet trading at Minneapolis. White wheat, influenced by good demand and a strong grower holding tendency, was firm at Portland. U. S. farmers put around 10 million bushels of 1962-crop wheat under price support during December, bringing the total for the season to nearly 216 million bushels compared with about 247 million a year earlier. Stocks of wheat in all positions January 1 were reported at 1.8 billion bushels, 9 percent below a year earlier. Rye advanced 3-4¢ per bushel at Minneapolis. Selling by farmers was light and terminal stocks were small.

Corn closed 1-2¢ lower despite good demand for light offerings from the country. However, some traders expected country shipments to pick up when the weather moderates. Oats weakened slightly, largely in sympathy with the decline in corn. Trading was held in check by light offerings. Barley was not much changed in quiet trading. Grain sorghum prices held firm with good demand readily absorbing light offerings.

Oilseeds advanced, with soybeans up 2-4¢ per bushel and flaxseed 3¢ higher. Movement of soybeans from the country remained slow, but the market was supported by higher prices for end products and a continued high rate of crush during December.

Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - amount put under price support by States .....	12-15
Grains - amount under price support .....	16

PRICE SUPPORT ACTIVITIES ... through December 31, 1962, show that farmers had put 215.7 million bushels of 1962-crop wheat under price-support loans and purchase agreements. This was up about 10.2 million bushels from a month earlier but was 31.1 million bushels less than the quantity of 1961-crop wheat put under support through December 31, 1961. Most 1962-crop wheat put under support was put into loans -- 148 million bushels stored in warehouses and 65.5 million bushels stored on farms. Repayments through December 31, totaled only 4.5 million bushels compared with 51.4 million a year earlier. Farmers also put nearly 106.8 million bushels of 1962-crop corn under support during December. This brought the total corn put under support through December 31, 1962, to 135.3 million bushels -- almost 52.5 million more than the quantity put under support through December 1961. About three-fourths of the corn under support was in farm-stored loans. During December farmers put 16.4 million bushels of 1962-crop soybeans under price support, bringing the total through December 31, 1962, to 48.6 million bushels, or nearly 44.3 million less than the quantity of 1961-crop soybeans put under support as of the same date a year earlier. Of the 48.6 million bushels of soybeans put under support this season, almost 25.5 million were in warehouse-stored loans and 22.8 million were in farm-stored loans. Farmers also had put more rye, oats, grain sorghum, and flaxseed but less barley under support through December 31, 1962 than a year earlier. (See details in tables on pages 12-16.)

FOOD FOR PEACE AUTHORIZATIONS ... issued this week provide for financing the purchase of about 430,500 metric tons of U. S. wheat under Title I, Public Law 480. Purchase authorizations were issued to Nationalist China for about 100,000 metric tons, to Korea for about 210,000 metric tons, to Yugoslavia for about 100,000 metric tons, and to Paraguay for about 20,500 metric tons. Wheat grading U. S. No. 2 or better, in bulk, will be eligible for financing under the authorizations.

Grains: Export prices at specified points, January 24, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

1/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on the sedimentation test rather than on the protein test.

1/ Carlots converted to bushels on basis one carlot is equivalent to 2,000 bushels corn.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Jan. 1963	Dec. 1962	Nov. 1962	Jan. 1962
<u>Soybean Oil:</u>					
Average price at crushing plant.....	Cents per lb.	8.8	8.6	8.6	10.4
Value from bushel of soybeans <u>1/</u> .....	Dollars	0.97	0.95	0.95	1.14
<u>Soybean Meal, 44%:</u>					
Bulk price at Decatur.....	Dollars per ton	71.10	71.00	71.00	59.75
Value from bushel of soybeans <u>1/</u> .....	Dollars	1.67	1.67	1.67	1.40
Value of oil and meal from bushel of soybeans <u>1/</u> .....	Dollars	2.64	2.62	2.62	2.54
Market price of No. 1 yellow soybeans at Illinois points.....	Dollars per bu.	2.52	2.45	2.42	2.40
Spread between soybean price and value of oil and meal.....	Cents	12	17	20	14

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 47.0 pounds of meal. 2/ Preliminary.

NOTE: This table is for statistical comparison only.

QUARTERLY  
SUMMARY  
AND  
STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 6 No. 1

Washington 25, D. C.

January 28, 1963

Grain prices generally strengthened during the last quarter of 1962 reflecting in part the good export demand, somewhat smaller supplies and increased livestock numbers. January price levels of most classes of wheat, corn, grain sorghum, and soybeans were higher than a year ago, but durum wheat, rye, oats, barley, and flaxseed prices were lower.

WHEAT ... prices the first half of the season averaged 15¢ per bushel over a year earlier reflecting the smaller crop, the higher support rate and a moderately good export demand. Winter wheat advanced steadily during the six-month period and in January hard winter wheat prices were nearly 20¢ per bushel above a year ago and red winter 7-10¢ higher. Spring wheat gained until the close of navigation on the Lakes but turned lower in December and January. Ordinary protein spring wheat at Minneapolis in January averaged 2¢ per bushel below a year ago but 15 percent protein averaged 10¢ higher. Durum wheat prices were around \$1.00 per bushel under a year ago due mainly to the larger crop and increased world supplies. Stocks of wheat in all positions January 1 totaled 1.8 billion bushels, a drop of about 170 million from a year ago. Of the total stocks, Commodity Credit Corporation owned a little over 1 billion bushels. An additional 261 million were outstanding under support or resale, leaving around 522 million bushels of "free" wheat -- 79 million less than a year ago. Exports of wheat and flour, July through December, totaled 273 million, a drop of 95 million below the same months last year. Smaller exports reflect sharply increased production in Canada and other important world wheat producing areas.

RYE ... prices advanced gradually the first half of the season reflecting in part light marketings and heavy exports. Despite the advance, prices at Minneapolis the first part of January were 4¢ per bushel below a year ago. Rye stocks of 23.6 million were 4.1 million more than a year earlier. Disappearance of 25.7 million bushels, July through December, was 2.8 million above a year earlier due to the larger exports. These totaled nearly 12 million as against less than 4 million a year earlier. Imports were down sharply.

CORN ... prices advanced gradually during the first quarter of the season due in part to smaller marketings, record exports and smaller supplies. Market prices in January averaged 12¢ per bushel above a year ago. Stocks of corn in all positions on January 1 totaled 4.2 billion bushels, 273 million less than a year ago. CCC owned 958 million of the total stocks with an additional 538 million under loan or resale. CCC sales of corn, totaled 176 million, October through December this year as against 341 million last year. Record exports of 103 million were 12 million more than last year. A little over 900 million bushels of corn were fed the first quarter, down about 10 percent from a year earlier. The number of grain consuming animal units to be fed in 1962-63 is

currently estimated at 173.9 million compared with 168.6 million in 1961-62.

OATS ... prices have averaged around 2¢ per bushel under last season due in part to larger supplies in Canada. Market prices in January were at about last year's level. Stocks of 778 million bushels on January 1 were slightly larger than a year ago, but 11 percent below the 1957-61 average. Disappearance, mainly for feed, July through December, totaled 531 million -- 30 million below the same period last season. Exports of 17 million were 10 million more than a year earlier. Supplies of oats in Canada for 1962-63 at 573 million are 44 percent above last season.

BARLEY ... prices at the farm averaged 6¢ per bushel lower the first half this season than for the same period last season. Market prices in January were generally below a year ago except in California where prices averaged 5¢ higher. Stocks in all positions January 1 totaled 341 million up 2 percent from a year ago. Disappearance of 213 million bushels the first half of the season was 11 million below last season. Exports of 38 million compare with 23 million a year earlier. Imports of around 1 million were down sharply from the 11 million last season. Supplies of barley in Canada for 1962-63 at 224 million are about the same as the previous season but 132 million below the 5-year average.

GRAIN SORGHUM ... prices at the farm averaged slightly below a year ago for the first quarter of the season. Market prices in January were 9¢ per cwt. above January 1962. Stocks of 571 million cwt. were 10 million less than a year earlier. Of the total stocks, CCC owned 307 million with an additional 88 million cwt. under loan or resale. Exports of 16 million cwt. the first quarter were 6 million above a year ago. The quantity remaining for feed at 66 million cwt. was down slightly from the year before.

SOYBEAN ... prices at Illinois points the first quarter averaged 4¢ per bushel above the same period a year ago due in part to heavy export demand for soybeans as well as oil and meal. Prices in January were 12¢ above a year ago. Stocks of 528 million bushels on January 1 were the largest of record and 7 million above a year earlier. Exports and crushings were also at record levels with 68 million exported and 126 million crushed during the first quarter. These compare with 61 million and 114 million the comparable period last season. Through December 31, farmers put 49 million bushels of 1962-crop soybeans under price support as against 93 million a year earlier.

FLAXSEED ... averaged \$3.07 per bushel at Minneapolis the first part of January compared with \$3.46 a year earlier. The lower prices reflect the larger stocks which on January 1 totaled 24.4 million as against 15.7 million a year ago. Linseed oil prices were also sharply below last year. Exports of flaxseed, July through December, at 3.4 million were more than three times those of the previous season while crushings of 10.3 million were about the same. Supplies of flaxseed in Canada for 1962-63 at 21 million are slightly below 1961-62.

NOTE: Data on stocks, production and seed usage from Crop Reporting Board; imports, exports and quantity of wheat, rye, soybeans, and flaxseed processed from Census Bureau; and alcohol usage from Internal Revenue Service. October-December 1962 data partly estimated.

Rye: Supply and distribution, 1956-62

## MOST GRAINS BRING FIRM PRICES

Most cash grain prices finished on the firm side but rye lost ground during the week ended January 31. Trading was quiet with activity generally limited by light receipts.

Winter wheat closed unchanged to 2¢ per bushel higher. Country selling remained light. With producers reluctant to sell on a rising market and unsuitable loading weather in the country, marketings failed to satisfy good domestic and renewed export demand. Concern over possible cold-weather damage to winter wheat also was a factor in the cash market. Spring and durum wheat were about unchanged at Minneapolis as light offerings found somewhat indifferent demand. Trading in white wheat improved measurably in the Pacific Northwest and prices advanced 3¢ in Portland. With current cash prices about 7¢ above effective support, farmers were more willing sellers and all classes of buyers showed more interest. Pending export business also supported the market. Rye lost 5-6¢ per bushel at Minneapolis as buyers lowered bids with declining futures markets.

Corn prices were generally unchanged to occasionally 1 or 2¢ per bushel higher. Offerings were on the light side but demand was not too pressing. Oats showed little or no change in light trading but available offerings met fairly good demand.

Barley prices went up 2-4¢ per bushel with good demand for light receipts at Midwest markets but held about steady on the West Coast. Grain sorghum edged up 2¢ per cwt. behind stronger demand for small offerings.

Cash soybean prices fluctuated with the futures market but finished 3¢ per bushel higher. Demand was good, but selling by farmers remained light. Flaxseed held steady in quiet trading at Minneapolis.

Grains - inspected receipts at selected markets, July-December 1962 .....	14-15

P. L. 480 PRICE REVIEW REQUIREMENTS FOR FEED GRAINS ... were announced recently. Effective January 25, U. S. suppliers of corn, grain sorghum, oats, barley, and rye under Public Law 480, Title I or Title IV purchase authorizations will be required to obtain approval of contract prices from the General Sales Manager, Foreign Agricultural Service. Purpose of the review is to determine that the prices fall within the prevailing range of export market prices at the time of sale.

DOLLAR CREDIT WHEAT AUTHORIZATIONS ISSUED TO CHILE ... this week provide for financing dollar credit purchase of about 85,000 metric tons of wheat, grade U. S. No. 2 or better, in bulk, from U. S. suppliers under the Food for Peace program. Authorizations were issued under Title IV of Public Law 480.

FOOD FOR PEACE WHEAT AUTHORIZATIONS ... issued this week provide for the purchase of about 485,000 metric tons of wheat from U. S. suppliers under Title I of Public Law 480. Purchase authorizations were issued to India for about 450,000 metric tons of white wheat, to Yugoslavia for about 25,000 metric tons of soft red winter wheat, and to Bolivia for about 10,000 metric tons of hard red spring and hard red winter wheat. Only wheat grading U. S. No. 2 or better, in bulk, will be eligible for financing under the authorizations.

Grains: Export prices at specified points, January 31, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

1/ Reported on the basis of registrations of sales under the Payment-in-kind Program (GR-345) and the Cash Payment Flour Export Program (GR-346).

2/ Exports at domestic prices. 3/ Less than 1000 bushels

1/ Weekly data are for wheat only except Australia which includes flour. 2/ The week ends on Friday for U. S. data, Thursday for Argentina, Wednesday for Canada, and the previous Thursday for Australia.

1/ Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail and truck movement to Canada or Mexico.      2/ Bureau of the Census.

Based on weekly reports of inspections by licensed grain inspectors.

Washington 25, D. C.

February 8, 1963

## MOST GRAIN MARKETS WEAKEN

Soybean prices dropped sharply and most other cash grains closed on a softer note for the week ended February 7. Hard winter and soft white wheat, however, had firmer markets.

Hard winter wheat finished 1-2¢ per bushel higher but red winter closed around 1¢ lower. Farm selling remained light as producers continued to hold on a rising market. Demand was active for relatively light offerings. Mills needed supplies to cover export flour sales, while exporters were interested in buying for future delivery. Possible crop damage resulting from prolonged winter weather helped bolster the hard wheat market, while lack of export business was a weakening influence in red wheat. Spring and durum wheat prices softened despite good demand for light offerings. Active export interest boosted white wheat prices 2¢ in the Pacific Northwest. Soft wheat lost 3-4¢ per bushel. Demand was good but the market was undermined to a large extent by the lack of export news.

Spot corn was not much changed but showed a weak undertone. Demand was fairly good but offerings appeared to be about in line with trade needs. Oats also were generally unchanged in light trading. Barley finished steady to 4¢ lower under pressure from increased offerings. Grain sorghum prices were about unchanged as good demand readily absorbed light offerings.

Soybean prices dropped 8¢ per bushel. Demand was good, but the cash market was very sensitive to action in the futures market. Weakness in meal and oil and disappointment in weekly export inspection figures also helped depress the spot market. Flaxseed was unchanged in Minneapolis.

### Special Features

	<u>Page</u>
Grains - export prices at specified points.....	2
Grains - CCC sales against Certificate Pool.....	6
Grains - Title I, PL-480 export shipments, July-December 1962.....	6
Grains - supply and distribution, monthly.....	7
Grains - inspections for export from Canadian ports, by country of destination, January.....	7
Grains - inspections for export by classes, programs, coastal areas, and country of destination, January.....	8-9
Grains - inspections for export by classes and ports, January.....	10
Grains - inspections for export by coastal areas and country of destination, January.....	11

Grains - U. S. imports, December.....	13
Grains - CCC dispositions.....	14
Grains, Hard Red Spring and Hard Red Winter - distribution by protein brackets..	15
Grains and flour - export program rates.....	16

GRAINS INSPECTED FOR EXPORT ... increased sharply following settlement of the dock strike. Exports for the week ended February 1 totaled 23 million bushels as against a little over 4 million for the previous week. Exports for the week ended January 25 were from the Pacific Ports which area was not affected by the strike. Wheat exports for the week ended February 1 totaled 5.8 million bushels as against 2.4 the week before and 7.4 the comparable week a year ago. Exports during January totaled only 13.1 million bushels as against 35.3 during January 1962. Over 10 million bushels of corn were inspected during the week ended February 1, as against 61,000 the previous week. The January total of 10 million bushels was about one-fourth of the January 1962 total. Around 2.4 million bushels of soybeans were inspected during the week, which was the entire quantity inspected during January. This compares with 11.3 million exported in January 1962.

CORRECTION ... In Grain Market News Weekly Summary and Statistics issue of January 25, 1963, Page 8, Grain Sorghum CCC-owned stocks by States has been revised and should read as follows: Arizona 1,030, California 10,310, Idaho 10, Nevada 432 Oregon 92, Utah 191, Portland Area 491, and total 312,525. All in 1,000 cwt.

Grains: Export prices at specified points, February 7, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## GRAIN MARKET SHOWS MIXED TREND

Cash grain markets were erratic during the week ended February 14. Winter wheat and barley closed lower, but spring and white wheat, rye, corn and soybeans finished higher. Other grains showed little change.

Winter wheat declined 1-3¢ per bushel. Selling by farmers continued light, but both domestic and export demand slacked off and buyers had little difficulty satisfying their needs. Lack of interest in red wheat stocks at Chicago was reported discouraging to many traders. The critical moisture situation in some hard wheat areas also remained a market factor. Spring wheat offerings were light and in good demand at Minneapolis where prices went up 1-3¢. Durum, however, held steady. Pacific Northwest farmers marketed a fair volume of cash wheat at firm prices. Export trade was good, with additional business pending. Rye went up 2-3¢ behind reports of export news in Minneapolis.

Spot corn prices were unchanged to 3¢ per bushel higher. Demand was good from exporters as well as from domestic feeders and feed mixers. Offerings appeared about in line with trade needs. Oats held about steady as light offerings continued to limit trading. Barley prices softened as buyers became more selective in the face of increased offerings. Grain sorghum trends were mixed -- up 2¢ per cwt. in Ft. Worth but down 2¢ in Kansas City. Demand was slow in both areas.

Soybeans advanced 6¢ per bushel in Chicago and 3¢ in Minneapolis. The holding tendency on the part of producers, the larger weekly export inspection figure, and strength in oil and meal gave support to the upturn in cash prices of soybeans. Flaxseed held steady at Minneapolis. Weakness in linseed meal discouraged buying of flaxseed, but producers continued to sell very light amounts.

Feed grains - CCC sales against Certificate Pool.....	12

U. S. EXPORTS ... of wheat and flour totaled 277 million bushels the first half of the 1962-63 season. This is a drop of 90 million from the record of last season. Most of the decrease was in wheat grain since flour exports totaled 46.3 million bushels in grain equivalent or only 1.3 million less than in the same period of 1961. Exports of wheat and flour to the five Common Market countries dropped to 15.5 million bushels the first half of the season as against over 50 million in the same period last season. Exports to Turkey dropped 18 million to only 3 million the first six months of the season. Exports to Brazil were down by 9 million and to Yugoslavia by 10 million the first half of the season. Exports to India of 65 million were 19 million more than the same period a year earlier. Exports were down around a million bushels to the following countries, which in the six-month period received: Egypt 21 million, Japan 19 million, and Pakistan 18 million.

Flour exports totaled 20.1 million cwt. the first six months as against 20.7 million the same period a year earlier. Of the total flour shipments, 7.6 million cwt. were shipments for relief or charity compared with 6.7 million in the same months of last season. Our largest customer continues to be Egypt with exports of 4.5 million cwt. July-December this season as against 5.6 million last season. Of the total flour exports nearly 13.3 million cwt. were shipped through the Gulf ports -- an increase of 0.9 million cwt. Flour exports from Atlantic ports dropped to 1.3 million cwt. or 1.1 million less than in 1961. Exports through the Pacific ports of 2.5 million were nearly 1 million below the same months a year earlier. Flour exports through the Lake ports totaled nearly 3.0 million cwt. -- 0.6 million above the same months of the previous season. Detailed figures on pages 6-11.

FOOD FOR PEACE AUTHORIZATIONS ... were issued to Poland to finance the purchase of \$3,440,000 worth of wheat from U. S. suppliers under Title I, Public Law 480. This provides for the purchase of 60,000 metric tons which is limited to soft red winter wheat. Under the same program an authorization was issued to India to purchase about 57,000 metric tons of corn.

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

/Revised.

February 21, 1963

## GRAIN MARKETS LITTLE CHANGED

Cash grain prices fluctuated within a narrow range and generally showed little or no change at the end of the holiday-shortened week ended February 20.

Winter wheat finished 1-2¢ per bushel higher in the Southwest but declined 2¢ in the Midwest. Southwestern producers continued to hold. Movement was further hampered by the boxcar shortage resulting from large loading orders to the Gulf. Spot offerings were light. Demand improved from domestic users as well as exporters. Spring wheat looked firm and durum held steady at Minneapolis. Small receipts were taken readily as demand for cash wheat was good. White wheat was off 1-2¢ in the Pacific Northwest despite fairly good export business. Selling by farmers dropped off, however, at the lower level. Rye met slow trading and prices remained unchanged in Minneapolis.

Spot corn prices weakened. Offerings were light but about in line with demand which appeared to be a little slower. Most buyers were keeping a close eye on action in the futures market. Oats, like corn, finished on a weak note in light trading. Barley closed unchanged to 4¢ per bushel higher, with the most advance on the lower grades. Strength was attributed for the most part to smaller receipts. Grain sorghum prices held about steady with fair demand for light offerings.

Soybeans were off 1-2¢ per bushel at the close. Country marketings remained light, but weakness was attributed to softness in the futures market and in the end products. Weekly export inspection figure was down, and the January crush of 1.8 million bushels was only slightly larger than December's crushings. Flaxseed held steady in Minneapolis. Receipts were lighter but traders felt there was enough flaxseed to cover the balance of the year's needs.

---

### Special Features

	<u>Page</u>
Grains - export prices at specified points .....	2
Feed grains - CCC sales against Certificate Pool .....	6
Soybeans and flaxseed - supply and distribution, monthly.....	6
Barley, barley malt, oats, rye and flaxseed - U. S. exports by country of destination, July-December .....	7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - amount put under price support and outstanding by States .....	8-15
Grains - amount under price support .....	16

PRICE SUPPORT ACTIVITIES ... showed that farmers put 217.7 million bushels of 1962-crop corn under price-support loans and purchase agreements during January. This brought the total corn put under support thus far this season to 353 million bushels -- 66 million more than the same period a year earlier. Of the total corn under support, 306 million bushels were farm-stored loans, 43.5 million bushels were warehouse-stored loans, and 3.3 million bushels were under purchase agreement. Farmers also put 57.3 million bushels of 1962-crop wheat under price support during January, bringing the total wheat put under support through January 31 to 273 million bushels. This compared with almost 267 million bushels of 1961-crop wheat put under support through January 31, 1962. Most 1962-crop wheat put under support was in loans -- 176.9 million bushels in warehouse storage and 83.8 million in farm storage. Through January 31, 1963, farmers had repaid loans on 8.9 million bushels of wheat. About 58.9 million bushels of 1962-crop soybeans had been put under support through January 31. Of these, 27.8 million bushels were in warehouse-stored loans, 29.9 million in farm-stored loans, and 1.2 million under purchase agreements. Farmers had repaid loans on 5.3 million bushels of soybeans. (See pages 8-16 for additional price-support details.)

FIRST FEED GRAIN SIGNUP REPORT ... showed that through February 7 farmers on 128,400 farms have signed up to divert 2,005,533 acres of corn, 344,959 acres of grain sorghum, and 152,415 acres of barley production under the 1963 feed grain program. Total diversion of 2,502,907 acres is from base acreages (1959-60 average plantings) of 5,290,814 acres on these farms. Last year's first report under the 1962 feed grain program for the period through February 15 showed 168,468 farms signed up to divert 3,522,500 acres from 6,833,100 corn and grain sorghum base acreages. Also 55,705 farms had signed to divert 1,251,900 acres of barley from signed bases of 2,580,200 acres. A fall signup period was held for barley in 1962, but under the 1963 program barley is combined with corn and grain sorghum into one feed grain program, so no fall signup was conducted.

Grains: Export prices basis prompt or 30-day shipment, February 20, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	WHEAT <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2	No. 2	or Grain
			Yellow	Yellow	Sorghum 2/
			--Dollars--

Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

Simple average of daily closing prices.

Not available since quality premiums are based on the sedimentation test rather than on the protein test.

**GRAIN: Commodity Credit Corporation Estimated Non-committed Inventory**

## GRAIN MARKETS SHOW LITTLE CHANGE

Cash grain markets closed unchanged to generally no more than 2¢ higher or lower for the week ended February 28.

Winter wheat finished on a soft note. Offerings by farmers and interior elevators were heavier, reflecting the more favorable relationship of cash prices to effective support levels and the alleviation of the boxcar shortage. Domestic mills and exporters were actively seeking supplies. Interest was prompted partly by concern over a possible deficit in open market needs for the rest of the crop year. Spring wheat declined 1-2¢ at Minneapolis, where mills provided good outlets. Durum was up 5¢ on the low end of the price range, supported by light selling and the recent advance in the export subsidy. White wheat was off 1-2¢ in the Pacific Northwest in reaction to the recent heavy export sales. Selling by farmers, however, slowed at the lower price level. Rye held steady in light trading at Minneapolis.

Corn was unchanged to 2¢ per bushel higher at the close as moderate offerings continued to find strong demand from feeders, processors, elevators, and exporters. Oats edged up 1-2¢ as relatively light offerings met fairly good demand from cereal mills. Barley found little support and prices settled back 1-2¢. Demand, particularly from exporters, was narrow. Grain sorghum prices held firm behind fairly steady demand for light offerings.

Cash soybeans closed 1-2¢ per bushel higher as small spot offerings continued to find strong demand. Trading was on the nervous side, however, and generally followed the action on the futures markets for soybeans and end products. Flaxseed was unchanged in Minneapolis, where 10,000 bushels were bought to-arrive during one session.

TWO FOOD FOR PEACE AGREEMENTS WITH THE CONGO ... were announced this week. The agreements, negotiated under Title I of Public Law 480, provide for the sale of \$23,966,000 worth, including certain ocean transportation costs, of U. S. commodities. Included in the larger agreement were about 992,000 cwt. of wheat flour and about 2 million bushels of corn. Value of Title I programs with the Republic of the Congo to date totals \$42.8 million.

FOOD FOR PEACE AUTHORIZATION TO CONGO ... was issued this week under the recently signed agreement with that country. The authorization, issued under Title I of Public Law 480 agreement, provides for financing the purchase of about 43,000 metric tons of wheat flour, in bags, from U. S. suppliers.

FOOD FOR PEACE AUTHORIZATIONS ... were issued to India, Sudan and Iceland under Title I, Public Law 480, this week. An authorization to India provides for financing the purchase of about 400,000 metric tons of wheat, Grade U. S. No. 2 or better, in bulk, from U. S. suppliers. The authorization to Sudan provides for the purchase of about 40,000 metric tons of wheat flour, in bags. Authorizations issued to Iceland will finance the purchase of about 5,000 metric tons of wheat flour, in bags, and about 6,650 metric tons of yellow corn, Grade U. S. No. 4 or better, in bags, in the form of cracked corn or corn meal (100 percent extraction).

Grains: Export prices basis prompt or 30-day shipment, February 28, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <sup>1/</sup>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <sup>2/</sup>

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	Feb. 1963	Jan. 1963	Dec. 1962	Feb. 1963
Soybean Oil:					
Average price at crushing plant .....	Cents per lb.	8.7	8.8	8.6	10.2
Value from bushel of soybeans <u>1</u> / .....	Dollars	0.96	0.97	0.95	1.1
Soybean Meal, 44%:					
Bulk price at Decatur .....	Dollars per ton	72.55	71.85	71.00	57.8
Value from bushel of soybeans <u>1</u> / .....	Dollars	1.70	1.69	1.67	1.5
Value of oil and meal from bushel of soybeans <u>1</u> / .....	Dollars	2.66	2.66	2.62	2.4
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.59	2.55	2.45	2.4
Spread between soybean price and value of oil and meal .....	Cents	7	11	17	

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 47 pounds of meal.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

## CORN AND RYE DOWN - OTHER GRAINS ABOUT STEADY

Most cash grains, except corn and rye, showed little or no price change during the week ended March 7. Corn and rye sold lower.

Winter wheat finished unchanged to 2¢ per bushel higher as limited spot offerings continued to find good domestic and export demand. Current price levels stimulated selling by farmers, but the lack of boxcars hindered delivery. Prices dropped 5¢ per bushel on 15 percent protein spring wheat at Minneapolis, but all other proteins and durum held steady. Rather liberal offerings of high protein wheat of low milling quality prompted the loss. White wheat held firm at Portland, supported by a firm holding tendency in the country and substantial export trade, particularly with India. Rye lost 4-6¢ at Minneapolis, reflecting very slow spot demand and the lower futures market at Chicago.

Corn prices closed 1-4¢ per bushel lower. Demand became more selective and was directed more toward cars with favorable billing. Weakness was influenced to some extent by expectations of heavier selling as the weather warms up, by the slower outgo of commercial feeds, and by recently increased selling by CCC. Oats and barley held generally steady in light trading. Oats found good demand but offerings were limited. Barley receipts were up a little at Minneapolis, but daily arrivals were well cleaned up. There was some elevator interest reported in addition to maltster demand. Grain sorghum markets were about unchanged on meager offerings. Demand was less active in Ft. Worth but good in Kansas City.

Soybean trading was on the dull side throughout the period and prices finished on a weak note. Fresh news provided little stimulation for the cash market. This week's export inspections of 5.5 million bushels were up from the previous week, but many traders considered very little of this to be bookings made after the dock strike. Action of end products also failed to give much support to the cash market. Flaxseed held steady in quiet trading at Minneapolis.

SECOND FEED GRAIN SIGNUP REPORT ... showed that through February 21 farmers on 384,762 farms have signed up to divert 7,665,700 acres of corn, grain sorghum, and barley production under the 1963 feed grain program. This diversion is from base acreages (1959-60 average plantings) of 19,297,700 acres on these farms. Last year the report under the 1962 feed grain program for the signup period February 5 through February 21 showed 262,532 farms signed up to divert 5,632,200 acres from 11,378,900 corn and grain sorghum base acreages. Last year, there was no report of barley signup between February 15 and March 1. However, through February 15, last year 55,705 farms had signed to divert 1,251,900 acres of barley from signed bases of 2,580,200 acres.

Provisions for the 1963 program generally follow those for 1961 and 1962 crops by giving feed grain producers an opportunity to participate in the program by reducing acreages and to receive payments. By participating, they will receive diversion payments, price-support payments which are new to the 1963 program, and be eligible to take part in the price-support loan program. Price support for 1963 to farmers participating in the program will be made available partly through loans and purchase agreements and partly through an in-kind payment.

PRICE-SUPPORT RESEAL PROGRAM ON FOUR GRAINS ... was announced this week. Under the program farmers can continue price support loans on farm-stored grains after loan maturity dates this spring and earn storage payments. Farmers in many areas will be able to reseal farm-stored loans on 1962-crop wheat, barley, oats, and grain sorghum. In addition, loans on 1959-crop wheat, 1960-crop wheat and grain sorghum, and 1961-crop barley, oats and grain sorghum now under reseal may be extended for another year. The 1963 reseal program will be made available in designated areas for each of four grains on basis of determinations by State ASC Committees that program should apply in their States. Reseal on current (1962) wheat crop will be offered for one-year rather than two-year period. Also, storage payments will be limited to period of storage in all instances where grain is delivered earlier than reseal maturity date.

Grains: Export prices basis prompt or 30-day shipment, March 7, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>	Corn	Soybeans	Barley

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

<sup>4/</sup> Revised.

## SOYBEANS DOWN - OTHER GRAINS LITTLE CHANGED

Soybean markets worked downward during the week ended March 14. Price trends for other grains were mixed but generally unchanged to no more than 1 or 2¢ per bushel higher or lower.

Winter wheat ruled about steady in the hard wheat area but showed a firm tendency in the red wheat area. Offerings improved, particularly in the Southwest where reports indicated loan redemptions were picking up. Demand remained good, with exporters actively seeking flour as well as wheat. Spring wheat showed a little weakness but durum held steady at Minneapolis. Trading was on the slow side despite lighter receipts. White wheat held firm in the Pacific Northwest even though offerings picked up and export trade dropped off. Rye finished on a weak note at Minneapolis where fresh news was scarce.

Spot corn prices closed about unchanged. Light receipts met rather selective demand at most markets, but Chicago absorbed increased offerings as overall demand continued strong. Oats finished on the weak side. Offerings were light but so was demand. Barley found slow trading, but prices looked a little better on some of the lower qualities. Grain sorghum prices were generally unchanged, with trading limited to nearby needs.

Soybean prices dropped 3-5¢ per bushel, reflecting slower demand and weaker oil and meal markets. Weekly export inspection of 3.9 million bushels failed to add much support to the market. Although export shipments are running ahead of last year's pace, this had been expected by many traders. Flaxseed held steady in Minneapolis.

NOTICE

Headings of the columns showing U. S. flour exports by country of destination in the table published on pages 6 and 7 of the February 15, 1963 issue of GRAIN MARKET NEWS do not clearly indicate the programs under which flour is exported. The column, "Commercial," includes sales made for dollars and under the CCC Credit program, and exports made under Titles I, II and IV of Public Law 480, A.I.D., and barter. The column, "Relief or charity," represents donations for export made under Section 416 of the Agricultural Act of 1949, as amended in Public Law 480. The heading of the "Commercial" column will be changed to "Dollar and program" and a footnote indicating which programs are included in this column will be shown in the table, "Wheat and Flour: U. S. exports by country of destination" in future issues of GRAIN MARKET NEWS.

GRAIN INSPECTIONS FOR EXPORT ... during February totaled almost 134 million bushels. Of these, 53.5 million bushels were wheat, 34.2 million corn, 18.5 million grain sorghum, and 19.8 million soybeans. Of the 53.5 million bushels of wheat inspected, 35.9 million bushels were Hard Red Winter, 10.4 million White, 3.7 million Soft Red Winter, and 3.4 million Hard Red Spring. Other inspections included 4.2 million bushels of barley, 2.4 million of rye, and 1.2 million of oats. Inspections for the first two months of 1963 now total 167.4 million bushels, compared with 213.8 million the same two months of 1962. However, the dock strike sharply reduced export inspections in January 1963. Of the 134 million bushels of grain inspected for export in February, 87.6 million were for export from Gulf ports, 31.3 million from Atlantic ports, and 14.9 million from Pacific ports. About 58 percent of the wheat and corn, 80 percent of the soybeans, and all of the grain sorghum were inspected at Gulf ports. (See tables on pages 7 and 12.)

Grains: Export prices basis prompt or 30-day shipment, March 14, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>1/</sup> Simple average of daily closing prices.

<sup>2/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

## GRAIN MARKETS UNSETTLED

Cash grain markets followed an erratic course in slow trading during the week ended March 21. Closing prices were down sharply on soybeans and red winter wheat but showed little or no change on most other grains.

Hard winter wheat finished on a firm note, reflecting good demand for light offerings. Spot wheat trading was poorly tested in the Midwest. Both hard and red winter wheat prices were readjusted in line with the transition from March to May futures, with St. Louis 3¢ per bushel lower and Chicago 4-8¢ lower. Light offerings of spring wheat met slow demand at Minneapolis, and prices held steady on spring but dropped 3¢ on durum. White wheat closed weaker in the Pacific Northwest where exporters were not aggressive and country selling remained slow. Rye held steady on a quiet market at Minneapolis.

Corn prices edged up a little as spot offerings were readily absorbed at most markets. Wet weather and muddy roads delayed shipments from the country. Oats held about steady with light offerings limiting trading. Barley prices softened as demand was slack despite rather light offerings. Grain sorghum prices were about unchanged as current offerings about matched demand.

Soybean prices dropped 5-6¢ per bushel, partly reflecting action in the futures market. Early strength attributed to prospective plantings of a record 30 million acres was more than offset by the announcement that price support would be at the same level as last year and continued export movement of soybeans and end products. Flaxseed was unchanged in quiet trading at Minneapolis.

---

### Special Features

	<u>Page</u>
Grains - export prices at specified points .....	2
Seed grains - CCC sales against Certificate Pool .....	6
Soybeans and flaxseed - supply and distribution, monthly .....	6
Grains - prospective U. S. plantings for 1963 .....	7
Corn - receipts by grades at selected markets, December 1962-February 1963 .	7
Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - amount put under price support and outstanding by States .....	8-15
Grains - amount under price support .....	16

PRICE SUPPORT ACTIVITIES ... showed that through February 28 farmers had put 464.3 million bushels of 1962-crop corn under loans and purchase agreements. This compares with 412.2 million bushels put under support as of the same date a year earlier. Of the total corn put under support so far this year, about 54.7 million bushels were stored in warehouses, 403.7 million on farms, and 5.9 million bushels were under purchase agreements. Farmers also had put nearly 296.9 million bushels of 1962-crop wheat under price support through February, of which loans had been repaid on about 29 million bushels. A year earlier 271.2 million bushels of wheat had been put under support. Almost 69 million bushels of soybeans were put under support through February. This compared with 131.3 million bushels a year earlier. Loans had been repaid on 10.1 million bushels. (See details on pages 8-16.)

NATIONAL AVERAGE SUPPORT PRICES FOR 1963-CROP OILSEEDS ... have been set at \$2. per bushel for soybeans and \$2.90 per bushel for flaxseed. Support rates are the same as for 1962, and reflect about 75 percent of the March parity price of \$3.01 per bushel for soybeans and \$3.89 for flaxseed. To be eligible for support, soybeans must grade No. 4 or better and contain not more than 14 percent moisture, and flaxseed must grade No. 2 or better. Soybean loans and purchase agreements will be available from time of harvest through January 31, 1964. Unless demand is made earlier, nonrecourse loans in all States will mature on May 31, 1964. Flaxseed loans and purchase agreements will be available from harvest through October 31, 1963, in the States of Arizona and California, and through January 31, 1964, in all other States. Direct purchases, if needed in humid counties in Texas, will be made through July 31, 1963. Nonrecourse loans will mature on January 31, 1964, in Arizona and California, and on March 31, 1964, in all other States unless demand is made earlier.

FEED GRAIN SIGNUP REPORT ... showed that through March 7 farmers on 642,835 farms have signed up to divert 13,126,000 acres from corn, grain sorghum, and barley production under the 1963 feed grain program. The diversion averages 36.7 percent base acreages (1959-60 average plantings) of 34,796,400 acres on signed farms. Last year, signup through March 8 showed that 527,836 corn and grain sorghum farms had signed up to divert 12,319,800 acres from base acreages of 26,595,500 acres. In addition, 68,086 barley-producing farms had been signed up to divert 1,653,700 acres from 3,960,100 base acres.

Grains: Export prices basis prompt or 30-day shipment, March 21, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	WHEAT <sup>1/</sup>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <sup>2/</sup>
-- Dollars --					
Baltimore .....	No. 2 Red Winter	2.21	1.36	2.74	1.28
Gulf .....	No. 1 Hard Winter,				
	Ordinary protein	2.47	1.33	2.72	2.14
	14% protein	2.59	-	-	-
Pacific Northwest	No. 2 Western White	2.24	-	-	1.08

<sup>1/</sup> Does not include the export payment rate for wheat which on March 21, was 71¢ per bushel for red winter from Baltimore and hard winter from the Gulf, and 60¢ for soft white from the West Coast.

<sup>2/</sup> No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

**Cash grain closing prices, f.o.b. track, compared with support price at principal terminals**  
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## GRAIN MARKETS SHOW MIXED TREND

Cash grain markets closed on a mixed note for the week ended March 28. Winter wheat and soybeans were firmer, but other grains were either unchanged or a little weaker.

Firmness in hard winter wheat reflected good demand for limited offerings and reports of the growing need for rain in some areas. Red wheat turned upward in the Midwest in a reaction to last week's downturn and to increased interest by domestic mills from as far away as Texas. Spring wheat looked a little softer as larger receipts met slower demand at Minneapolis. White wheat was about unchanged in the Pacific Northwest. Rye held firm in quiet trading at Minneapolis.

Corn finished around 2-3¢ per bushel lower at most markets. Demand was rather selective. Offerings, although not heavy, were ample. Oats weakened in sympathy with corn and continued to find narrow demand. Barley prices were not much changed except for a slight decline on thin kinds and feed types at Minneapolis. Grain sorghum prices weakened at Kansas City but held steady at Ft. Worth, with shallow demand at both points.

Soybeans went up 3¢ per bushel, reflecting for the most part a late gain in meal prices. Continued good export inspections also were a supporting factor. Flaxseed held steady at Minneapolis, with receipts small.

Grains - inspected receipts at selected markets, February .....	10-11
Soybean prices compared with soybean oil and meal prices .....	12

PRELIMINARY ESTIMATE OF 1963 FEED GRAIN SIGN-UP ... indicates that nearly 1.3 million farms have signed up to divert close to 26 million acres from corn, barley, and grain sorghum production under the 1963 feed grain program. Diversion represents more than a third of the 75-million base-acreage of farms signed to participate this year. Indications are that a larger proportion of the nation's base acreage will be on participating farms in 1963 than in 1962, but the acreage diverted will probably be less. Signup ended March 22. Final figures on the number of farms and the acreage signed up under the 1963 feed grain program are expected to be available about the first or second week in April.

FOOD FOR PEACE WHEAT AUTHORIZATION ISSUED TO POLAND ... this week will finance the purchase from U. S. suppliers of about 200,000 metric tons of wheat, U. S. Grade No. 2 or better, in bulk. Authorization was issued under Title I of Public Law 480. Only the following wheat will be eligible for financing: (1) hard red spring of the subclasses dark northern spring, northern spring, and red spring; (2) hard red winter of the subclasses dark hard winter, hard winter, and yellow hard winter; and (3) mixed wheat containing not more than 5 percent of the classes of wheat, excluding durum, other than the classes specified in (1) and (2). Sales contracts made between April 2 and May 31 will be eligible for financing. Delivery will be to importer, f.o.b. vessel, Great Lakes, Atlantic or Gulf ports, or Canadian transshipment points. Shipments may be made between April 2 and June 30.

FOOD FOR PEACE DOLLAR CREDIT AGREEMENT WITH COLUMBIA ... announced this week, will finance the sale of \$6,815,000 worth of U. S. agricultural commodities. The agreement, negotiated by the United States and Columbia under Title IV of Public Law 480, which authorizes long-term dollar credit sales abroad, includes about 1.1 million bushels of wheat, wheat flour or bulgur wheat. It is the first dollar credit sale to Columbia under Title IV. Sales will be by U. S. private traders. Credit purchase authorizations will be announced later.

Grains: Export prices basis prompt or 30-day shipment, March 28, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Baltimore .....	No. 2 Red Winter	2.24	1.34	2.76	1.24
Gulf .....	No. 1 Hard Winter,				
	Ordinary protein	2.48	1.31	2.74	2.11
	14% protein	2.60	-	-	-
Pacific Northwest .	No. 2 Western White	2.24	-	-	1.08

1/ Does not include the export payment rate for wheat which on March 28, was 72¢ per bushel for red winter from Baltimore and hard winter from the Gulf, and 59¢ for soft white from the West Coast.

2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

Cash grain closing prices, f.o.b. track, compared with support price at principal terminals  
All prices rounded to nearest cent per bushel except grain sorghum per cwt.

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Soybean prices compared with market value of soybean oil and meal

		Mar.	Feb.	Jan.	Mar.
	Unit of value	1963	2/ 1963	1963	1962
Soybean Oil:					
Average price at crushing plant .....	Cents per lb.	9.2	8.7	8.8	10.1
Value from bushel of soybeans 1/ .....	Dollars	1.01	0.96	0.97	1.11
Soybean Meal, 44%:					
Bulk price at Decatur .....	Dollars per ton	70.55	72.55	71.85	60.65
Value from bushel of soybeans 1/ .....	Dollars	1.66	1.70	1.69	1.43
Value of oil and meal from bushel of soybeans 1/ .....	Dollars	2.67	2.66	2.66	2.54
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.58	2.59	2.55	2.44
Spread between soybean price and value of oil and meal .....	Cents	9	7	11	10

1/ Based on assumption that a bushel of soybeans yields 11.0 pounds of oil and 47.0 pounds of meal. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

## WINTER WHEAT HIGHER - OTHER GRAINS ABOUT UNCHANGED

Winter wheat prices advanced 3-5¢ per bushel during the week ended April 4. Other grains fluctuated within narrow limits and closed at about last week's level.

Winter wheat climbed 3-5¢ per bushel as exporters competed actively for light offerings. The big jump was in ordinary protein wheat for direct export and for milling for flour export. Further strengthening factors were reports of severe damage in the Southwest to the 1963 wheat crop. Spring wheat markets were quiet with prices mostly unchanged from a week ago. Domestic flour business was slow. Durum wheat market was weak with the top grades unchanged but lower qualities 1¢ off from a week ago. Wheat prices in the Pacific Northwest went up as much as 4¢ behind a good export inquiry and light offerings. Rye was unchanged to 2¢ higher reflecting in part reports of some crop damage in North Dakota.

Corn prices fluctuated within narrow limits with gains or losses of 1¢ at most points. Strength at some points stemmed from good export business and heavy domestic usage. Weakness at other points reflected substantial receipts. Oats were unchanged to 1¢ higher due to light receipts and a fair demand. Barley markets were steady to firm as demand continued good. Grain sorghum held steady at Ft. Worth but dropped 2-3¢ per cwt. at Kansas City.

Soybeans declined 1-2¢ per bushel reflecting the slow demand for light offerings. Export interest was light and the unfavorable crushing ratio was a depressing factor. Flaxseed held steady at Minneapolis.

Food for Peace Authorizations and Agreements, March 29-April 4, 1963 .....	8
Grains - U. S. imports, February .....	8

1964 WHEAT PROGRAM ... was announced March 29 as follows: (1) set May 21 as the date for a referendum on the 1964 wheat program; (2) established wheat support prices at \$2.00 per bushel national average for certificated wheat and \$1.30 per bushel for non-certificated wheat if the referendum carries; (3) set the national marketing quota at 1,220 million bushels and the national acreage allotment for 1964 at 49,500,000 acres -- the same as in 1962; (4) determined a wheat marketing allocation for certificated wheat of 975 million bushels, 80 percent of the national marketing quota. Individual producers will receive marketing certificates for 80 percent of the normal production on their acreage allotments; (5) announced State acreage allotments based on the national allotment; (6) set diversion payment rates on wheat acreage put to conserving uses; (7) announced there will be no non-commercial wheat-producing States designated under the 1964 program.

FOOD FOR PEACE WHEAT AUTHORIZATION ISSUED TO POLAND ... was announced March 29, to finance purchase of about 50,000 metric tons of wheat, U. S. Grade No. 2 or better in bulk, from U. S. suppliers. Authorization was issued under Title I, Public Law 480. Only the following wheat will be eligible for financing: (1) soft red winter of the subclasses red winter and western red; (2) mixed wheat containing soft red winter, hard red spring or hard red winter wheat. Sales contracts made between April 5 and April 30 will be eligible for financing.

RESEAL WHEAT TO CARRY ORIGINAL PREMIUM VALUE ... was announced March 28. Resealed 1962-crop wheat with premium valuations based on sedimentation test will carry the same premium for settlement of loans as it had at the time the loan was originally made. It applies to farm-stored hard red winter, hard red spring, and hard white wheats of the 1962 crop. Producers are assured that they will not be responsible for any declines in sedimentation values during the period of reseal storage in return for their agreement to keep this wheat binned separately. This is the first crop of wheat on which sedimentation values have been used as the basis for premium under the price support program.

Grains: Export prices basis prompt or 30-day shipment, April 4, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u> Grade	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <u>2/</u>
--Dollars--					
Baltimore .....	No. 2 Red Winter	2.28	1.34	2.75	1.26

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## GRAIN MARKETS STRENGTHEN

Most cash grain prices closed unchanged or a little higher for the week ended April 11. Corn, however, finished on a weak note.

Winter wheat generally advanced 1-3¢ per bushel as mills and exporters competed aggressively for light offerings. The boxcar shortage continued to restrict the flow of wheat to market in many areas. Much needed showers fell in some areas, but others continued critically dry. Nearly half of the winter wheat in the Southern Plains reached the jointing stage. Spring wheat went up 3¢ at Minneapolis where offerings were consistently small, but durum was unchanged to 2¢ lower on a thin market with not much demand. White wheat advanced 3-4¢ on limited offerings in the Pacific Northwest. Rye drew some support from fresh export news and gained 2-3¢ at Minneapolis.

Corn prices closed unchanged to 1¢ per bushel lower. Slower feeding demand narrowed outlets in the Southwest, but slightly larger offerings were readily absorbed in the Midwest. Oats were generally steady in quiet trading on limited offerings. Barley markets looked firm in the Midwest but weaker on the West Coast. Grain sorghum markets were about unchanged with moderate offerings finding rather narrow demand.

Soybeans held firm in quiet trading. Offerings were light, and export interest continued slow. Farm stocks, estimated at 136 million bushels on April 1, were 17 percent below last year's record high. Flaxseed was unchanged in limited trading at Minneapolis.

Food for Peace Agreement, April 5-11, 1963 .....	16

SIGNUP REPORT ON 1963 FEED GRAIN PROGRAM ... shows that through the March 22 closing date 1,247,906 farms have been signed up to divert 25,676,475 acres from corn grain sorghum, and barley production this year. The diversion averages 33.6 percent of base acreages (1959-60 average plantings) of 76,454,599 acres on signed farms. Corn diverted acreage signed up for 1963 amounts to 17.7 million acres compared with nearly 22.9 million in 1962. Grain sorghum acreage diverted this year totals 4.9 million acres compared with 6.7 million under the 1962 program. Barley diverted acreage signed up for 1963 amounts to 3,055,753 acres compared with 3,093,600 acres under the 1962 program.

FLAXSEED MAY BE PLANTED ON ACREAGE DIVERTED ... under the 1963 feed grain and wheat programs. This also was permitted under the 1962 programs. Diversion acreage on which flaxseed is planted will not be eligible for acreage diversion payments under the programs. Also, flaxseed produced on diverted acres will not be eligible for price support. However, producers will be eligible for full price support on their wheat, corn, grain sorghum, or barley production.

SALES POLICY FOR ANY TAKE-OVER 1962-CROP FLAXSEED ... was announced recently. Any flaxseed taken over under the 1962 price support program after the March 31 maturity date for loans and purchase agreements will be offered for sale for unrestricted use. Sales will be made, basis in store, at the market price but not less than 105 percent of the 1962 support rate, plus carrying charges. This policy will remain in effect until July 15, 1963, at which time, dependent upon market conditions and 1963 crop prospects, consideration may be given to offering moderate quantities of flaxseed on a competitive bid basis for export only, either as seed or linseed oil.

WINTER WHEAT PRODUCTION ... is estimated on the basis of April 1 conditions at 927 million bushels. This is 10 percent less than the December 1962 forecast. Expected production is 14 percent more than the 816.4-million-bushel 1962 crop, according to the Crop Reporting Board, but is 7 percent below the 1957-61 average of 997.7 million bushels.

Grains: Export prices basis prompt or 30-day shipment, April 11, 1963

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

Ecuador .....	April 5	Wheat	550 bu..	1,052

FLEET-STORED WHEAT MADE AVAILABLE FOR P. L. 480 SALES ... at Atlantic seaboard terminal elevators. CCC-owned hard red winter and hard red spring wheat stored in reserve ships of the maritime merchant fleet will be made available in store at Atlantic seaboard terminal elevators under certain conditions in redemption of payment-in-kind export certificates in addition to offering it f.o.b. vessel basis. Fleet-stored spring wheat thus acquired must be exported only against purchase authorizations under Title I, Public Law 480. To be exported, the wheat must be upgraded to U. S. No. 2 or better, either as hard red spring or mixed wheat. Prices at which this wheat will be made available for certificate redemption will be announced daily by the Evanston ASCS Commodity Office. Previously, fleet-stored wheat was offered only on an f.o.b. vessel basis. At the end of March, less than 20 million bushels of CCC-owned wheat were stored in fleet ships on the East Coast and at the Hudson and James River anchorages.

## WINTER WHEAT DOWN - OTHER GRAINS LITTLE CHANGED

Winter wheat prices dropped sharply during the week ended April 18, but other cash grain markets generally showed little or no change.

Winter wheat closed 1-8¢ per bushel lower as offerings from the country increased in the face of diminishing mill and export demand. More CCC-owned wheat became available as prices approached the statutory level, but "free wheat" was offered sparingly. Rain is needed badly in the southern Great Plains where most of the wheat is in the boot stage or heading. However, winter grains made rapid advancement in the northern Great Plains. Spring wheat held firm on light receipts at Minneapolis, but durum lost 2-8¢ as buyers lost interest. Shipping directions were slow and new business in semolina was very quiet. White wheat finished on a weak note in limited trading in the Pacific Northwest. Rye held steady in dull trading at Minneapolis.

Corn prices edged up 1-2¢ per bushel at most markets. Strength in the spot market was attributed mainly to the good export market for corn. Oats were about unchanged in dull trading. Barley markets were mixed -- 1-2¢ lower in the Midwest but 1-3¢ higher on the West Coast. Grain sorghum prices held steady in draggy trading. Offerings about matched demand.

Soybeans finished about unchanged on an unsettled market. Weekly export inspection figures were not very impressive to many traders, and action of the markets for end products was discouraging. Delay of take-over date until July 31 on price-support loans and purchase agreements was a supporting factor in late trading. Flaxseed held steady in Minneapolis.

COUNTY AND TERMINAL 1963-CROP WHEAT PRICE-SUPPORT RATES ... were announced this week. Terminal rates range from \$2.00 to \$2.27 per bushel for Grade No. 1 wheat; county rates, from \$1.49 to \$2.08 per bushel. County rates for major producing areas generally reflect terminal rates less handling and freight charges needed to get the wheat to terminals. County and terminal rates are adjusted up or down for grade and quality to determine support prices for individual producers. Price-support premiums and discount schedules for different grades and qualities will be announced later. While the national average support price for 1963-crop wheat is \$2.00 per bushel to producers participating in the voluntary acreage reduction program, the county and terminal support loan rates are based on national average loan price of \$1.82 per bushel. The remaining 18¢ per bushel of the support price will be an in-kind payment to participants based on the normal production of the farm's acreage for harvest.

TAKE-OVER DATE FOR 1962-CROP SOYBEANS UNDER PRICE SUPPORT ... has been extended two months or through July 31, 1963. Take-over was set originally to begin after May 31, but was extended to give producers additional time in which to redeem their loans and market their soybeans in commercial channels.

QUANTITY OF 1962-CROP PUT UNDER PRICE SUPPORT ... loans and purchase agreements through March 31 totaled 504.1 million bushels. This compares with 498.5 million bushels of 1961-crop corn put under support through the same day a year ago. Quantities of other grains put under support were little changed from February since the final date for putting grain under support has passed except for corn. Through March 31 farmers had repaid loans on 41 million bushels of 1962-crop wheat 15.9 million bushels of 1962-crop soybeans. (See price support details in tables on pages 8-16.)

EXPORT SALES OF CCC-OWNED CORN AND GRAIN SORGHUM ... now will be charged as Announcement Gr-212 sales rather than against the feed grain certificate pool. While sales of feed grains against the certificate pool are for unrestricted use, sales under certain circumstances were made with transit and delivery arrangements that facilitated exportation. This type sale will be made in the future under provisions of Announcement Gr-212.

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

				: Metric Tons	: 1,000 Dollars
India.....	April 12	39-92	Wheat	400,000	25,600
Viet-Nam.....	April 18	45-21	Wheat Flour	30,000	2,390

- 7 -  
Wheat: Supplies available for export or carryover in the United States,  
Canada, Argentina, and Australia April 1, 1961-63

ITEM	: 1962-63 :	: Preliminary: 1961-62 :	: 1960-61
UNITED STATES			
--Million bushels--			
Carryover stocks, July 1.....	1,305	1,411	1,314
Crop.....	1,092	1,235	1,357
Total supplies.....	2,397	2,646	2,671
Domestic requirements for season <u>1/</u> .....	605	629	606
Supplies available for export or carryover.....	1,792	2,017	2,065
Exports, July 1 through March 31 <u>2/</u> .....	423	535	490
Supplies on April 1 for export or carryover.....	1,369	1,482	1,575
CANADA			
Carryover stocks, August 1.....	391	608	600
Crop.....	558	283	517
Total supplies.....	949	891	1,117
Domestic requirements for season <u>1/</u> .....	150	142	156
Supplies available for export or carryover.....	799	749	979
Exports, August 1 through March 31 <u>2/</u> .....	211	245	206
Supplies on April 1 for export or carryover.....	588	504	755
ARGENTINA			
Carryover stocks, December 1 of preceding year.....	13	35	60
Crop.....	184	190	150
Total supplies.....	197	225	210
Domestic requirements for season <u>1/</u> .....	130	135	135
Supplies available for export or carryover.....	67	90	75
Exports, December 1 through March 31 <u>2/</u> .....	32	45	24
Supplies on April 1 for export or carryover.....	35	45	51
AUSTRALIA			
Carryover stocks, December 1 of preceding year.....	22	28	64
Crop.....	295	246	274
Total supplies.....	317	274	338
Domestic requirements for season <u>1/</u> .....	78	74	79
Supplies available for export or carryover.....	239	200	259
Exports, December 1 through March 31 <u>2/</u> .....	60	65	64
Supplies on April 1 for export or carryover.....	179	135	195
TOTAL FOR THE FOUR COUNTRIES			
Carryover stocks, beginning of season.....	1,731	2,082	2,038
Crop.....	2,129	1,954	2,298
Total supplies.....	3,860	4,036	4,336
Domestic requirements for season <u>1/</u> .....	963	980	976
Supplies available for export or carryover.....	2,897	3,056	3,360
Exports, season through March 31 <u>2/</u> .....	726	890	784
Supplies on April 1 for export or carryover .....	2,171	2,166	2,576

1/ Estimated requirements for seed, food (milling for domestic use), and feed for the season.

2/ Exports of wheat and flour in grain equivalent.

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 11    No. 17

Washington 25, D. C.

April 26, 1963

## GRAIN PRICES EXCEPT SOYBEANS GENERALLY LOWER

Winter wheat, corn, rye, and flaxseed dropped to lower levels during the week ended April 25. Oats, barley and grain sorghum closed about unchanged. Soybeans closed higher.

Hard winter wheat continued to weaken with prices mostly 2-4¢ per bushel lower. Weakness stemmed from increased offerings from country points, smaller export demand and availability of government stocks at statutory minimum prices. Offsetting this were reports of deteriorating crop prospects as lack of moisture became critical in some areas. Red winter wheat closed about unchanged to 2¢ higher. Ordinary protein spring wheat held steady with a fair demand, but higher protein types lost 2-5¢ per bushel. Durum wheat was unchanged in light trading. White wheat continued easy with prices unchanged to 1¢ lower in the Pacific Northwest. Rye dropped 5¢ at Minneapolis. Traders attributed the drop to lower than expected price for export sale of rye to Germany.

Corn prices declined 1-2¢ per bushel partly in reaction to last week's gain. Offerings were ample for the fair local demand. Export interest was well maintained. The oat market was steady in quiet trading. Barley markets were unchanged to 2¢ higher at Minneapolis with demand moderate. A good export inquiry boosted prices 3-4¢ per bushel at Portland. Grain sorghum markets were steady with moderate supplies well taken.

Soybean prices advanced 3-4¢ per bushel at the close, after being on the soft side throughout the week. The stocks in all positions report gave some strength to the market. Flaxseed lost 3¢ per bushel in quiet trading at Minneapolis.

---

Soybean prices compared with soybean oil and meal prices .....	10
Wheat and flour - export program rates .....	11

FEED GRAIN CREDIT SALES ... of corn, oats, rye, barley, and grain sorghum will again be permitted to Belgium, Luxembourg, Denmark, the Netherlands, Switzerland, Sweden, the United Kingdom, and West Germany under the CCC export credit sales program. The credit period will be limited to six months. Under the CCC export credit sales program, agricultural commodities owned by CCC are offered for sale for export with payment and interest deferred for periods up to three years. For purchases under the program, assurance of payment by a bank in the United States is required. Feed grain credit sales to these countries were discontinued January 12, 1959, because a substantial increase in such sales during October-November 1958 appeared to adversely affect the movement of free supplies of grains under the payment-in-kind program.

CANADIAN GRAIN STOCKS ... on March 31 were larger this year than a year ago according to reports from the Dominion Bureau of Statistics. Stocks of wheat totaled 669 million bushels as against 581 million a year earlier. The larger stocks reflect the larger crop since exports, August-March, at 211 million were 33 million below last year. Oat stocks at 281 million were 121 million more than a year ago. Barley stocks totaled 140 million this year as against 107 million bushels last year. Rye and flaxseed stocks were at about last year's level. (Details, page 10)

GRAIN STOCKS ... on April 1 were smaller than a year ago according to the Crop Reporting Board. Wheat stocks of 1,503 million bushels were 8 percent below a year earlier with CCC holdings of 948 million down nearly 100 million. Total corn stocks on April 1 were 3,040 million -- down 10 percent from a year ago. CCC holdings were down by over 200 million bushels. Grain sorghum stocks of 826 million bushels were 3 percent less than a year earlier. Soybean stocks totaled 344 million as against 356 million bushels last year. (Details page 9)

Grains: Export prices basis prompt or 30-day shipment, April 25, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

/ Simple average of daily closing prices.

/ Not available since quality premiums are based on the sedimentation test rather than on the protein test.

The above rates on wheat and wheat flour shall serve as the export allowances to be used in establishing prices for CCC wheat for export under announcements GR-261 and GR-262 as provided therein. 1/ For the class "Mixed Wheat" on all coasts, the respective rates for the classes comprising the mixture will apply. 2/ The West Coast "Other Classes" rate for the period July 16, thru August 14, 1963, is applicable to sales of White Wheat for shipment from California ports during the period June 1 thru August 14, 1963.

1963-CROP WHEAT PREMIUMS AND DISCOUNTS...were announced this week. There are 2 changes from 1962 schedule. One is to make joint use of sedimentation & protein tests in computing premiums & discounts for hard wheats of red winter, red spring & white classes. Other is reduction of premiums on subclasses of Durum wheat now in more plentiful supply.

AND  
STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

Volume 6 No. 2

Washington 25, D. C.

April 26, 1963

Grain prices, except wheat, weakened slightly during the January-April period with most prices in April averaging above a year earlier. Wheat prices, except durum, advanced during the past period with hard wheat showing the biggest gain over a year ago. Weakness in feed grains stemmed in part from large supplies and somewhat smaller exports. Grain prices during the first three weeks of April were above last year with the exception of durum wheat, barley and flaxseed.

WHEAT ... prices strengthened the first two weeks of April but winter wheat prices dropped erratically the third week. Smaller marketings, good export interest and poorer crop prospects were strengthening factors. The support rate for the 1963 crop is \$1.82 per bushel with an additional 18¢ payment for compliance with acreage reduction. With the 18¢ paid directly to the producer, the 1963 market support rate compares with \$2.00 for the 1962 crop. Hard winter wheat at Kansas City the first three weeks of April, averaged 28¢ per bushel above a year ago while red winter at Chicago was 2¢ over. At Minneapolis, ordinary spring wheat averaged 1¢ per bushel higher, 15 percent 6¢ higher while durum wheat was 67¢ lower. Soft white wheat at Portland averaged 13¢ per bushel above a year ago. Stocks of wheat in all positions on April 1 totaled 1,503 million bushels - 139 million below a year earlier. Of the total stocks, the Commodity Credit Corporation owned 948 million bushels. An additional 293 million were outstanding under support or resale, leaving around 262 million bushels of "free" wheat. This compares with 368 million at the same time a year ago. Exports of wheat and flour totaled 423 million bushels, July through March, 112 million less than the same months last season. Flour millings the first nine months totaled 454 million bushels - a drop of 13 million from last year but well above the average. Canadian stocks of wheat on March 31 totaled 669 million bushels compared with 581 million a year earlier and 904 million the record in 1957.

RYE ... prices declined around 3¢ per bushel the first four months of the year but the average at Minneapolis for the first three weeks of April was about at last year's level. Stocks of 15.4 million bushels in all positions April 1 were 5 percent above a year ago but 4 percent less than average. Disappearance of 34.3 million bushels, July through March, was 6.5 million above last season due to the larger exports. These totaled over 17 million as against 4 million a year earlier. Imports continued small.

CORN ... prices at the farm, January through March, averaged 9¢ per bushel above last year. Market prices the first three weeks of April, although somewhat below January, were 6-9¢ above a year earlier. The higher prices this season stem in part from smaller sales by CCC and the heavier feeding. Corn stocks of 3,040 million on April 1 were 345 million below last year. CCC owned

788 million on April 1 this year, as against 997 million a year earlier. An additional 934 million were under loan or resale this year as against 865 million last year. CCC sales of corn, October through March, totaled 478 million bushels compared with 673 million the same period last season. Disappearance of corn the first half of the season at 2,244 million bushels was slightly below last season's record, due to the smaller exports. Exports of 182 million bushels of corn the first 6 months were 26 million below last year's record but well above any other year. Nearly 85 million bushels of corn were used for wet milling - the largest of record. Corn feeding of 1,959 million was slightly above last season. Animal units for 1962-63 are estimated at 174.0 million compared with 168.7 million for 1961-62. Feeding of corn per animal unit totaled 11.3 bushels the first half of this season as against 11.5 last year and 10.7 two years ago.

OATS ... prices weakened slightly the first four months of the calendar year but the April average was at about last year's level. April 1 stocks totaled 494 million about the same as a year ago but 11 percent below the average. Disappearance, mainly for feed, July through March, totaled 817 million - 25 million below the same period last year. Exports of nearly 20 million were 12 million more than a year earlier. Canadian stocks of oats, March 31, totaled 281 million this year as against only 160 million last year.

BARLEY ... prices at the farm, January through March, averaged 13¢ per bushel below the same months last year. Market prices in April ranged from 10¢ lower than a year ago at Minneapolis for malting to 20¢ lower at Portland while California prices were at about last year's level. Barley stocks in all positions April 1 totaled 232 million - up 15 million from a year ago. Disappearance of 322 million bushels, July through March, was 22 million below last year. Exports of 51 million bushels compare with 47 million a year earlier. Imports of 1.4 million were down sharply from the 13 million last season. Stocks of Canadian barley, March 31, totaled 140 million - 33 million above a year ago.

GRAIN SORGHUM ... prices at the farm averaged 3¢ per cwt. higher than a year ago for the first three months of the calendar year. Market prices the first three weeks of April were 2-4¢ per cwt. above April 1962. Stocks of 463 million cwt. were 14 million less than a year earlier. Of the total stocks, CCC owned 258 million with an additional 131 million under loan or resale. Exports of 33 million cwt. the first half of the season compare with 26 million the same months last season. The quantity remaining for feed at 156 million was about the same as the year before.

SOYBEAN ... prices at Illinois points January through March, averaged 16¢ per bushel above a year earlier and in April were 6¢ higher. The general strength in the market reflects the record exports and crushings and limited marketings. Some reaction to the higher prices was due in part to a build-up in soybean oil stocks and unfavorable crushing margin. Stocks of 344 million bushels in all positions, April 1 were 12 million below the record of a year ago. Exports of 106 million were 13 million more than last year. Crushings of 249 million compare with 230 million in the comparable six-month period last season.

FLAXSEED ... prices averaged \$3.10 per bushel at Minneapolis the first three weeks of April compared with \$3.59 a year earlier. The lower prices reflect the larger stocks which on April 1 totaled 18.6 million or about double those of a year ago. Exports of flaxseed, July through March, at 3.5 million were more than three times those of the previous season. Crushings of flaxseed totaled 15.7 million, an increase of about 2 percent. Stocks of flaxseed in Canada on March 31 totaled 9.7 million or slightly above a year ago but well below stocks of nearly 16 million on March 31, 1961.

1/ Owned and stored in bins or other storage owned or controlled by CCC. Additional CCC-owned grain is included in other positions.

2/ All off-farm storages not otherwise designated.

3/ Does not include Canadian wheat milled in bond, but includes about 10,000,000 bushels of wheat used annually for breakfast food.

4/ Mostly quantity fed, but includes industrial use, waste, loss, and statistical errors in estimates.

Volume 11    No. 18                      Washington 25, D. C.                      May 3, 1963

## GRAIN MARKETS GENERALLY WEAKER

Cash grain markets weakened slightly with most prices except grain sorghum slightly lower for the week ended May 2.

Hard winter wheat was generally unchanged to 3¢ per bushel lower despite dry weather damage in the Southwest. Widespread showers brought temporary relief to small grain crops in most parts of the country. However, the scattered showers were generally too light to alleviate drought conditions in the Western Great Plains, although they benefited winter wheat and other fall-sown grains in the Central and Southern Great Plains. Red winter wheat was unchanged to 1¢ per bushel lower. Spring wheat was down 1-2¢ per bushel, with greater weakness in the higher protein wheats. No. 1 hard amber durum dropped 5¢ per bushel at Minneapolis. Rye remained unchanged at Minneapolis. White wheat gained 1-2¢ per bushel at Portland, influenced by good export and domestic demand for the small offerings.

Corn prices were generally unchanged to 1¢ per bushel lower. Demand was quite active but offerings were generally ample despite smaller CCC sales. Oats were unchanged. Barley was unchanged to 2¢ higher at Minneapolis with a strong demand for good malting kinds. Grain sorghum gained 1-2¢ per bushel with interest better than in several weeks. Dry weather was also a strengthening factor.

Soybeans were 2¢ lower. Processors were fairly well supplied and demand was inactive. Flaxseed remained unchanged at Minneapolis.

FINAL SIGNUP UNDER THE VOLUNTARY 1963 WHEAT PROGRAM ... was announced April 26. The report shows 428,558 farms have been signed up to divert 7,758,600 acres from wheat production to conserving uses this year. Last year under the mandatory 1962 wheat stabilization program 818,683 farms were signed up to divert 15,126,000 acres. However, actual acreage diversion amounted to about 11 million acres.

Participating farmers will be eligible for wheat price support at \$2.00 per bushel, national average. Of this, 18¢ per bushel will be an in-kind payment based on the normal production of the farm's acreage for harvest. The remaining \$1.82 per bushel support will be available through loans and purchase agreements.

Farmers who reduce wheat acreage by 20 to 50 percent will receive income-maintaining payments equal to 50 percent of the county loan rate (reflecting the \$1.82 national average) on the normal production (1959-60 average yields) of the diverted wheat acreage. The minimum diversion for participation is 20 percent of the wheat allotment, with special provisions for small farms. Farmers who participate must divert all the acreage signed up to be eligible for price support or for acreage diversion or price-support payments.

Grains: Export prices basis prompt or 30-day shipment, May 2, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

1/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## WEEKLY SUMMARY AND STATISTICS

GRAIN DIVISION

AGRICULTURAL MARKETING SERVICE

UNITED STATES DEPARTMENT OF AGRICULTURE

May 10, 1963

Volume 11 No. 19

Washington 25, D. C.

### MOST GRAINS ADVANCE

Most cash grains, except hard winter wheat, closed firm to higher for the week ended May 9.

Hard winter wheat lost 1-4¢ per bushel in the Southwest. Trading was quiet as demand slacked off and interest turned toward the oncoming new crop. Showers failed to bring much relief to some of the dry areas, but the 1963 crop matured rapidly. Light harvest is expected in the Low Plains area of Texas in the next 10 days. Red winter wheat prices showed little change in the Midwest. Spring wheat went up 3¢ and durum held steady at Minneapolis, but trading was light and the market was poorly tested. White wheat held firm in the Pacific Northwest. Rye edged up 1¢ at Minneapolis.

Spot corn prices generally closed 1-2¢ per bushel higher, supported mainly by continued good export demand. Planting of the 1963 corn crop made good progress under favorable weather conditions in most of the Corn Belt. Oats were about unchanged with light offerings finding limited demand. Barley advanced 2-6¢ at Minneapolis where buyers scrambled for the meager offerings. However, prices held steady elsewhere. Grain sorghum prices went up 4-6¢ per cwt. in Kansas City and 1¢ in Ft. Worth as scant offerings were rapidly absorbed by active demand.

Soybeans advanced 4¢ per bushel in spite of very little support from either the meal or oil markets. Strength was attributed mainly to trade interpretations of the export and statistical pictures. Flaxseed held steady at Minneapolis, with traders showing little interest in taking supplies at the present time.

COUNTY AND TERMINAL PRICE-SUPPORT RATES FOR 1963-CROP FLAXSEED ... were announced this week. County and 8 terminal loan rates are based on the 1963-crop national average support price of \$2.90 per bushel -- the same as for the 1962 crop. County and terminal rates, which vary chiefly because of location, are further adjusted by premiums and discounts for grade and quality factors to determine support price for individual producers. Terminal support rates, per bushel, for 1963-crop flaxseed grading No. 1 are as follows: Los Angeles, Calif.-\$3.43; San Francisco, Calif. - \$3.37; Duluth, Minneapolis, and St. Paul, Minn. and Superior, Wis.- \$3.13; and Corpus Christi and Houston, Texas - \$2.92. County rates for major producing areas, as in the past, generally reflect terminal rates less handling and freight charges needed to get the flaxseed to terminals. No. 2 grade flaxseed will be discounted 6¢ per bushel, and flaxseed with moisture content below 10.6 percent will receive premiums ranging from 1 to 4¢ per bushel depending on the percentage of moisture. Moisture content from 10.6 to 11 percent will receive no premium and flaxseed with a higher moisture content than 11 percent will not be eligible for support. Also flaxseed grading below No. 2 will not be eligible for support.

Grains: Export prices basis prompt or 30-day shipment, May 9, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Based on weekly reports of inspections for export by licensed grain inspectors and does not include rail or truck movement to Canada or Mexico. In some cases, the ultimate destination of the grain exported is not shown on the inspection reports. Therefore, the quantity for each country may vary from official Census data which are based on custom declarations.

## WHEAT MARKET DROPS

Wheat prices broke sharply during the week ended May 16. Most other cash grain markets were either unchanged or weaker.

Winter wheat prices dropped 8-12¢ per bushel in the Southwest and mostly around 4-5¢ in the Midwest. Losses generally reflected an adjustment to a new-crop basis. First arrivals of 1963-crop winter wheat were reported in North Central Texas and in Oklahoma this week. Moderate offerings of old-crop wheat found poor buying interest as most buyers preferred to await new-crop supplies. Spring wheat prices dropped 10-11¢ at Minneapolis, but durum went up 2-5¢. Buyers were determined to adjust prices downward in line with the spread between May and July wheat at Minneapolis. Also, export business was not very large, and domestic flour trade was limited. Improvement in the durum market reflected more interest on the part of buyers in very light offerings. White wheat declined 2¢ in very slow trading in the Pacific Northwest. Rye was off 2¢ in dull trading at Minneapolis.

Corn prices fluctuated within a narrow range during the week, with closing quotations no more than 1¢ per bushel higher or lower than last week's close. Demand held up fairly well, and moderate offerings found ready takers. Oats closed about unchanged with light offerings generally limiting trade. Barley was off as much as 4¢ on fairly large offerings at Minneapolis, but prices were only a little weaker on the West Coast. Grain sorghum prices held firm in dull trading.

Soybeans lost 2-4¢ per bushel, largely in sympathy with a declining futures market. Quiet oil and meal markets provided little support to the spot soybean market. Trade concern centered mainly on analysis of export figures and carryover projections. Flaxseed held steady in Minneapolis.

STORAGE CONTRACTS FOR 1963-CROP HARD WHEAT ... were announced this week. Hard wheat placed under price support loans this year will be stored under the Uniform Grain Storage Agreement with the same terms that applied to most warehousemen under the 1962 price support program. Settlement with warehousemen will be based, under the 1963 program, on the market value of the grade, quality and quantity of wheat which the warehouseman is obligated to deliver to CCC. Settlement with all warehousemen under the 1963 program will reflect the current market value of the protein content of the wheat at the time of delivery. Last year's option feature, under which warehousemen could elect instead to settle on the basis of the published sedimentation premium schedule under the loan program, has been discontinued. Official protein and sedimentation certificates will be required for all warehouse-stored 1963-crop hard wheat put under price support. This will insure that all wheat farmers will obtain the price support premiums to which they are entitled for production of high quality wheat.

CONTRACTS TO PROCESS CCC-OWNED WHEAT INTO BULGUR FOR DONATION ... were awarded this week. Approximately 291,397 bushels of CCC-owned wheat will be processed under the contracts into 15,203,300 pounds of bulgur for donation abroad under the Agency for International Development (AID) programs. USDA so far has acquired about 284,654,900 pounds of bulgur through processing of approximately 5,432,709 bushels of CCC-owned wheat.

Grains: Export prices basis prompt or 30-day shipment, May 16, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

✓ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

✓ Simple average of daily closing prices.

✓ Not available since quality premiums are based on the sedimentation test rather than on the protein test.

Volume 11    No. 21                      Washington 25, D. C.                      May 24, 1963

## GRAIN PRICES GENERALLY UNCHANGED TO LOWER

Hard winter wheat and barley prices continued to weaken while most other grains were about unchanged for the week ended May 23.

Harvesting of the winter wheat crop increased in the Southwest as Enid, Oklahoma received 50 cars of new wheat the first three days of the week. With increased receipts, prices dropped around 5¢ per bushel at Ft. Worth and 1¢ at Kansas City. The downturn in prices sparked some interest but most buyers preferred to await volume harvest. Reflecting local shortages, red wheat was unchanged to 2¢ higher at Chicago and St. Louis. Spring wheat was mostly unchanged from a week ago with a fairly good demand for light offerings. Durum wheat was unchanged to 5¢ lower as buying became more selective. White wheat continued to slide, losing 6¢ per bushel in the Pacific Northwest markets. Export demand was slow. Rye was steady at Minneapolis reflecting light arrivals and limited demand.

Corn markets were rather steady with only minor price changes. Rains improved crop prospects but cold weather hindered growth. Commercial and export interest continued moderate with much of the receipts from previous CCC sales. The oats market weakened due to increased receipts. Export interest was light. Barley prices dropped 4¢ at Portland and were unchanged to 4¢ lower at Minneapolis. Demand for better malting types was good but outlets for the lower qualities were poor. Grain sorghum gained 1¢ per cwt. with improved demand for scant receipts.

Soybeans finished about unchanged with a slightly weaker market at Chicago offset in part by the improved situation at Minneapolis. Prices reflected the generally dull market for the end products. Export interest was only moderate. Crushings of soybeans during April amounted to nearly 40 million bushels, bringing the total since October 1 to 285 million as against 266 million a year earlier.

Flaxseed held steady in Minneapolis with No. 1 quoted at \$3.07 per bushel.

Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - amount repaid, delivered, and outstanding under price support by States	8-15
Grains - amount under price support .....	16

PRELIMINARY RESULTS OF WHEAT REFERENDUM ... show that 47.79 percent, or 547,15 of the 1,144,927 preliminary total vote cast, a record, voted for marketing quotas for the 1964 crop, while 52.31 percent, or 597,776 farmers voted against marketing quotas. Because the for vote was less than two-thirds approval as required by law, marketing quotas will not be in effect on the 1964 wheat crop. As required by law when marketing quotas are disapproved, acreage allotments -- previously announced a 49.5 million acres -- will continue in effect as a condition of eligibility for price support at 50 percent of parity beginning July 1, 1965. Total preliminary vote does not include 73,245 challenged ballots.

QUANTITY OF 1962-CROP CORN PUT UNDER PRICE SUPPORT ... loans and purchase agreements through April 30 totaled almost 532 million bushels. This compares with 548. million bushels of 1961-crop corn put under support through April 1962. Of the 532 million bushels put under support, 450 million bushels were farm-stored, 63 million warehouse-stored, and 19 million bushels put under purchase agreements. During April farmers put 27.9 million bushels of 1962-crop corn under support, compared with 39. million in March and 50.1 million bushels during April 1962. Through April, farmers had repaid loans on 23.5 million bushels of 1962-crop soybeans put under support. Most of the repayments, in million bushels, were in Arkansas 3.5, Illinois 6.3, Indiana 1.3, Iowa 5.4, Minnesota 2.7, and Missouri 1.7. (See pages 8-16).

Grains: Export prices basis prompt or 30-day shipment, May 23, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## WHEAT MARKETS DROP

Winter and white wheat prices broke rather sharply during the holiday-shortened week ended May 29. Price trends for most other grains were mixed, but changes were generally no more than 3¢ up or down.

Winter wheat closed 11-13¢ per bushel lower at Fort Worth and around 4-8¢ lower at most other markets. Demand was only fair, reflecting the lack of mill activity and the tendency of many buyers to hold up while awaiting further adjustments to a new-crop basis. Combining was slowed by rains early in the week, but machines were back in the fields when the weather cleared and harvesting moved northward at a rapid pace. Despite the close supply situation in Chicago, red wheat had difficulty holding its ground in view of the hard wheat decline. As a result, prices were down 6-8¢. Spring wheat held firm on limited offerings at Minneapolis, but durum closed unchanged to 5¢ lower. White wheat lost 8¢ in the Pacific Northwest. Rye moved up 3¢ at Minneapolis as limited offerings were readily absorbed.

Spot corn prices stood 1-3¢ per bushel higher at the close. Strength stemmed mainly from good demand for lighter offerings. Oats ruled firm, supported by good demand for limited offerings. Barley prices weakened under pressure from new-crop harvesting in some areas. Grain sorghum markets held firm with fairly good demand for light offerings.

Soybeans declined 1-3¢ per bushel. Demand was good but the market was influenced more by the lower futures market and by trade interpretations of crop and weather reports. Flaxseed held steady at Minneapolis.

---

Grains - inspected receipts at selected markets, April .....	10-11
Food for Peace Authorizations, May 24-29, 1963 .....	12

TERMINAL AND COUNTY PRICE-SUPPORT LOAN RATES FOR 1963-CROP BARLEY ... were announced recently. National average support price is 96¢ per bushel for 1963-crop barley grading No. 2 or better. The 1963 program provides for a 14¢ per bushel payment-in-kind and an 82¢ per bushel average price-support loan rate. Thus, all terminal market price-support loan rates are adjusted downward 11¢ per bushel to reflect the difference between the national average loan and purchase agreement support prices of 93¢ in 1962 and 82¢ in 1963.

TERMINAL AND COUNTY PRICE-SUPPORT LOAN RATES FOR 1963-CROP GRAIN SORGHUM ... were announced recently. National average support price is \$2.00 per cwt. for 1963-crop grain sorghum grading No. 2 or better. The 1963 program provides for a 29¢ per cwt. payment-in-kind and a \$1.71 average price-support loan rate. Terminal market support rates, except for California terminals, are adjusted downward 22¢ per cwt. to reflect the difference between the 1962 and 1963 national average loan and purchase agreement support price of \$1.93 for 1962 and \$1.71 for 1963.

COUNTY PRICE-SUPPORT RATES FOR 1963-CROP OATS ... were announced recently. Rates are based on the 1963 national average support price of 65¢ per bushel for grade No. 3 oats. County price-support rates for 1963 are increased 3¢ per bushel from 1962, except that for all counties in North Dakota and certain counties in Minnesota, Montana, and South Dakota the increase is 1-2¢ per bushel.

CHANGES IN EXPORT GRAIN INSPECTION CERTIFICATES ... issued under the U. S. Grain Standards Act have been proposed. Proposal would standardize the information on the certificates and require more complete information on the quality of the grain. Information required would include -- in addition to the grade -- the test weight per bushel, moisture content, and other commonly-recognized factors. The changes, would improve trade communications with foreign buyers of U. S. grain. Proposed amendments are scheduled for publication in the June 1 Federal Register.

Grains: Export prices basis prompt or 30-day shipment, May 29, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <u>1/</u>		Corn	Soybeans	Barley
	Grade	Price	No. 2 Yellow	No. 2 Yellow	or Grain Sorghum <u>2/</u>
--Dollars--					
Baltimore .....	No. 2 Red Winter	2.26	1.38	2.71	1.20
Gulf .....	No. 1 Hard Winter,				
	Ordinary protein	2.20	1.36	2.70	2.15
	14% protein	2.32	-	-	-
Pacific Northwest	No. 1 Western White	2.15	-	-	1.07

1/ Does not include the export payment rate for wheat which on May 29, was 43¢ per bushel for red winter from Baltimore, 43¢ for hard winter from the Gulf, and 46¢ for soft white from the West Coast.  
2/ No. 3 barley at Baltimore, and No. 2 barley in the Pacific Northwest; No. 2 yellow grain sorghum at Houston or Galveston.

## Cash grain closing prices, f.o.b. track, compared with support price at principal terminals

All prices rounded to nearest cent per bushel except grain sorghum per cwt.

1/ Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

2/ Simple average of daily closing prices.

3/ Not available since quality premiums are based on the sedimentation test rather than on the protein test.

**GRAIN: Commodity Credit Corporation Estimated Non-committed Inventory**

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Current sales do not include nonstorable grain or grain destined for export.

-----  
Soybean prices compared with market value of soybean oil and meal

	Unit of value	May 1963 2/	April 1963	March 1963	May 1962
Soybean Oil:					
Average price at crushing plant .....	Cents per lb.	9.2	9.0	9.2	9.2
Value from bushel of soybeans 1/ .....	Dollars	0.98	0.96	0.98	1.01
Soybean Meal, 44%:					
Bulk price at Decatur .....	Dollars per ton	68.05	68.40	70.45	63.80
Value from bushel of soybeans 1/ .....	Dollars	1.60	1.61	1.66	1.50
Value of oil and meal from bushel of soybeans 1/ .....	Dollars	2.58	2.57	2.64	2.51
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.56	2.55	2.58	2.47
Spread between soybean price and value of oil and meal .....	Cents	2	2	6	4

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.0 pounds of meal for 1962-63. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. May 29, to 3:30 p.m., e.d.t. May 31, 1963.

## GRAIN MARKETS SHOW MIXED TREND

Cash grain markets closed on a mixed note for the week ended June 6. Prices of most classes of wheat dropped sharply, while oats, barley and flaxseed showed a weaker trend. On the other hand, spring wheat advanced substantially, while corn and soybeans registered moderate gains.

Winter wheat held steady at Ft. Worth but finished irregularly and sharply lower elsewhere. Losses ranged from 2-4¢ per bushel at Chicago, 3-7¢ at Kansas City, and 13-17¢ at St. Louis. Much of the loss, however, represented a further adjustment to a new-crop basis. Demand was not too urgent as both domestic and export buyers appeared satisfied to await further crop developments. Scattered rains and showers interrupted harvesting but favored the filling of heads in less mature fields. Quality of new-crop southwest wheat has been good so far, according to trade reports, and test weights are high. Spring wheat advanced 7-8¢ behind rather broad demand for limited offerings in Minneapolis. Durum, however, was unchanged to 5¢ lower with only fair demand. White wheat lost 8¢ in the Pacific Northwest, reflecting slow export demand and an adjustment to a new-crop basis. Rye held firm on relatively light arrivals at Minneapolis. Some buyers were filling prior export sales and mills appeared interested in accumulating rye at present price levels.

Spot corn finished 1-4¢ per bushel higher, reflecting light offerings by farmers, limited CCC selling, and continued good demand. Oats weakened as demand failed to absorb a slight increase in offerings. Malting barley firmed up a little at Minneapolis, but the barley market was down 1-3¢ on the West Coast and 6¢ in Kansas City. Grain sorghum prices held about steady with limited offerings finding relatively steady demand.

Soybeans finished around 2-4¢ per bushel higher. Light offerings met good demand, but this was offset by disappointment in export figures and by trade interpretations of the supply and demand balance for the rest of the season. Flaxseed declined 2¢ at Minneapolis.

BARTER PROJECT WITH BRAZIL ... was approved by USDA recently. Project is designed to furnish Brazil with about 200,000 tons of CCC-owned wheat in exchange for Brazilian metallurgical grade manganese ore, ferromanganese produced in the United States from manganese ore from Brazil, and muscovite block mica and beryl ore, also from Brazil.

PURCHASE OF 17.1 MILLION POUNDS OF BULGUR FOR FOREIGN DONATION ... was announced by USDA this week. Bulgur is to be processed from privately-owned hard red winter or hard red spring wheat. The total quantity, equivalent to 327,750 bushels of wheat, will be donated for overseas use under the Section 416 Program. With this purchase, a total of 70,776,200 pounds of bulgur have been obtained for domestic and foreign donation under the purchase program.

Food for Peace Authorizations, May 31-June 6, 1963

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## WINTER WHEAT DOWN - MOST OTHER GRAINS UP

Winter wheat prices generally continued downward as new-crop harvesting expanded during the week ended June 13. Spring wheat and most other cash grains, however, closed higher.

Winter wheat finished mostly 4¢ per bushel lower at Kansas City and Chicago as prices gave way under pressure from the expanding harvest and new-crop grain made its way to market. However, winter wheat edged up 2¢ at Ft. Worth where demand was good and farmers were holding tightly. Harvest was complete in some early sections, but storage space is plentiful in the Southwest and farmers are not pushed to sell. Spring wheat prices moved up as much as 3¢ in Minneapolis with offerings on the tight side. White wheat found light trading and a weak market in the Pacific Northwest. Rye held firm at Minneapolis, influenced mainly by strength in wheat and reports of some frost damage in the Dakotas.

Corn prices ranged 2-6¢ per bushel higher at the close, and stood at or near the highest levels since June 1959. Strength was attributed to continued strong demand, domestic as well as export, and limited spot market offerings. Some country movement was reported, but very little came to terminals. Oats held firm on limited offerings. Barley was generally 1-2¢ per bushel higher, stimulated by fairly active demand for rather limited offerings. Grain sorghum prices advanced 4-6¢ per cwt. behind improved demand at Kansas City, but held steady at Ft. Worth where buyers appeared satisfied to await volume new-crop offerings.

Soybeans moved up 2-3¢ per bushel, but spot trading was limited by the lack of offerings. Most traders continued to busy themselves with analyses and projections of supply and demand conditions for the balance of the year. Flaxseed held steady in quiet trading at Minneapolis.

Wheat - estimated production by States, June 1, 1963 .....	15

MAY WHEAT EXPORT INSPECTIONS HIT A RECORD 72.4 MILLION BUSHELLS ... or 5.5 percent more than the previous all-time monthly high of 68.6 million bushels set in April. Despite heavy exports during the past two months, the 494.5 million bushels of wheat inspected for export during July 1962-May 1963 were 65.5 million bushels less than the same 11 months a year earlier. Of the 72.4 million bushels of wheat inspected for export during May, 46.1 million bushels -- nearly 64 percent -- were hard red winter variety. White wheat accounted for almost 18 percent of the total, or 12.8 million bushels. Soft red winter and mixed wheat each accounted for around 8 percent of total May inspections. More than half of the wheat inspected for export during May went through Gulf Coast ports. About 19 percent was inspected at Pacific ports, 17 percent at Atlantic ports, and 6 percent at Great Lakes ports. (Details by classes and ports appear on page 7.)

WHEAT PRODUCTION FOR 1963 ... is forecast by the Crop Reporting Board at nearly 1.1 billion bushels on the basis of June 1 conditions. This is 1 percent less than the 1962 crop and 12 percent below the 1957-61 average. Winter wheat production is now estimated at 855 million bushels -- 30 million less than the May 1 forecast, 38 million above 1962, and 143 million below average. A 230-million-bushel spring wheat crop is expected to be 17 percent below last year's relatively large crop but about 1 percent above average.

SOUTHEAST AND MID-ATLANTIC CORN SALES ... on a delivered basis against feed grain program certificates were discontinued June 7. About 2,150,000 bushels of corn were sold in Southeast and Mid-Atlantic deficit feed grain areas from Jan. 9, 1962, through June 7, 1963.

Grains: Export prices basis prompt or 30-day shipment, June 13, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

Port Markets	Wheat <sup>1/</sup>	Price	Corn No. 2 Yellow	Soybeans No. 2 Yellow	Barley or Grain Sorghum <sup>2/</sup>

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

June 8, 1962 .....	415	1,751	767	452	10,324	610,051	151,398	1,358

<sup>1/</sup> Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Current sales do not include nonstorable grain or grain destined for export.

## GRAIN MARKETS MIXED BUT LITTLE CHANGED

Cash grain markets showed a mixed trend for the week ended June 20, but net changes were generally limited to 1 or 2¢ either way.

Winter wheat closed around 1-2¢ per bushel higher as a rule, but prices were down 2¢ on the low side of the range at Kansas City. Farmers were holding, and virtually all offerings were readily absorbed by mills and merchandisers. Harvesting was more than half finished in Texas and parts of Oklahoma. Combining made good progress in Kansas and was well ahead of this time last year. Red wheat was under some pressure from expanded harvesting in Missouri and southern Indiana and Illinois. Spring and durum wheat held firm in a thin market at Minneapolis. Offerings sold readily but mainly for spot needs. White wheat finished on a weak note with narrow demand in the Pacific Northwest. Rye held steady in a quiet market at Minneapolis.

Corn was generally unchanged to 2¢ per bushel higher as moderate offerings found active domestic and export demand. Crop conditions remained favorable. Oats weakened under pressure from increased offerings and favorable crop reports. Barley markets ranged from 2¢ higher to 2¢ lower. Lighter offerings found good demand at some markets, while larger offerings met slower demand at other points. Grain sorghum markets held firm, supported by active demand for available offerings.

Soybeans fluctuated within a narrow range during the period and closed about unchanged. Cash trading closely followed action on the futures market. Weather, crop, labor, and international news were influences in day-to-day changes. Late strength was attributed to the report on crushings -- about 41 million bushels crushed in May which brought the October-May total to 326 million bushels this season compared with almost 305 million bushels for the same period last season. Flaxseed held steady in Minneapolis.

Wheat, rye, corn, oats, barley, grain sorghum, soybeans and flaxseed - amount repaid, delivered, and outstanding under price support by States..	8-15
Grains - amount under price support .....	16

PRICE SUPPORT ACTIVITIES ... through May 31 showed that farmers had put almost 573 million bushels of 1962-crop corn under price-support loans and purchase agreements. This compares with nearly 626 million bushels of 1961-crop corn put under support as of the same date a year earlier. About 67 million bushels of the corn put under support this year were in warehouse-stored loans, 463 million were in farm-stored loans, and around 43 million bushels were under purchase agreements. Loan repayments through May 31 covered 6.2 million bushels of farm-stored corn and 579,355 bushels of warehouse-stored corn. Farmers also had repaid loans on nearly 32 million bushels of 1962-crop soybeans out of the almost 69 million bushels put under support through May 31. Wheat loans repaid through May totaled around 53 million bushels this year compared with almost 131 million bushels last year. (Other price-support details on pages 8-16.)

TERMINAL AND COUNTY PRICE-SUPPORT RATES FOR 1963-CROP RYE ... were set recently. Rates are based on the 1963-crop national average support price of \$1.07 per bushel for rye grading No. 2 or better, or grading No. 3 on the factor of test weight only. While the national average support rate for 1963 is 5¢ per bushel higher than for 1962, terminal rates are being adjusted upward 7¢ per bushel. The additional 2¢-per-bushel increase in terminal rates results from shifts in production from areas of higher support to areas of lower support. County rates for major producing areas reflect, as in the past, terminal rates less freight and handling charges needed to get the rye to terminal markets. Beaumont, Texas, has been added as a storage-only terminal this year.

CANADIAN SEEDING PROGRESS ... through May 31 is ahead of last year and average, according to the Dominion Bureau of Statistics. An estimated 91 percent of the total 1963 Canadian acreage expected to be sown to spring wheat, oats, barley, flaxseed, and mixed grains was seeded by May 31. Seeding was only 83 percent completed by that date last year. The 1957-61 average is 90 percent.

Grains: Export prices basis prompt or 30-day shipment, June 20, 1963  
(All prices per bushel except grain sorghum per cwt. f.o.b. vessel)

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

## WINTER WHEAT DOWN - CORN UP

Winter wheat prices continued downward under harvest pressure but corn markets registered further strength during the week ended June 27. Other cash grains were generally unchanged.

Hard winter wheat held steady at Ft. Worth but turned unevenly 1-7¢ per bushel lower at Kansas City, with the low end of the ordinary protein range off the most. Rains delayed harvesting but farmers still were not active sellers, so offerings fell short of strong domestic demand. Wheat with high protein and sedimentation characteristics was in lighter supply and strongest demand. Red winter wheat suffered sharp adjustments to a new-crop basis, with prices off 10¢ at Chicago and as much as 21¢ at St. Louis. Harvesting gained momentum in the red wheat area. Spring and durum wheat held steady in Minneapolis, with light offerings about matching slow demand. White wheat held steady in extremely slow trading in the Pacific Northwest. Rye was off 1-2¢, reflecting nearness of the new crop and very slow flour sales in Minneapolis.

Corn prices edged up another 1-3¢ per bushel and stood at or near new highs since August 1958. Light offerings found strong demand, but weather conditions and crop progress also were influencing factors. Oats were about unchanged with an indifferent demand for rather light offerings. Barley was about steady at most markets but went down 2-4¢ at Minneapolis where maltsters had lower price ideas and feed demand was more limited. Grain sorghum prices softened behind increased offerings.

Soybeans fluctuated in line with the futures market throughout the week but closed unchanged from a week ago. Cash offerings found ready demand, but trade interests centered mainly on crop, weather, and statistical news. Flaxseed held steady in quiet trading at Minneapolis.

CORN RESEAL PROGRAM ... under which farmers can obtain extension of current price support loans on farm-stored corn and earn storage payments, after the loan maturity date of July 31, 1963, was announced recently. Corn reseal program provides for extension of price support loans on corn of the 1962, 1960, and 1959 crops. Farmers also may convert purchase agreements on their 1962-crop farm-stored corn to reseal loans. Loans extended on farm-stored corn under the reseal program will mature July 31, 1964. Loans on the 1961-crop farm-stored corn were made extendable last year to July 31, 1964. Price support loans on 1958-crop stored corn will not be extended beyond July 31 this year. Reseal storage payments for the 1963-64 12-month storage period will be 14¢ per bushel. USDA also announced there will be no reseal program for 1962-crop soybeans.

BLANKET INSURANCE POLICY RECENTLY ACQUIRED FOR CCC GRAIN ... covers obligations of all warehouses operating under CCC's Uniform Grain Storage Agreement. Policy will substantially increase the protection afforded CCC under previous bonding requirements. Coverage, which runs for one year from July 1, 1963, is solely for the protection of CCC. Cost will be assessed on an equitable basis against warehousemen who have executed a Uniform Grain Storage Agreement with CCC.

Food for Peace Authorizations, June 21-27, 1963

Country	Date	Number	Commodity	Quantity	Market Value
				Metric tons	1,000 dollars
Poland .....	June 26	41-63	: Wheat 1/	: 13,000	839

<sup>1/</sup> Effective support price is the established terminal support rate minus a deduction for storage as of the date shown. Terminal price support rates are not established for corn, oats or soybeans at any market or for wheat and grain sorghum at Ft. Worth. However, Galveston support rates are used for Ft. Worth since cash prices at Ft. Worth usually are backed by paid-in freight to Galveston.

<sup>2/</sup> Simple average of daily closing prices.

<sup>3/</sup> Not available since quality premiums are based on the sedimentation test rather than on the protein test.

1/ Based on marketing year July 1 for barley, oats and grain sorghum; October 1 for corn.

In some weeks adjustments have been made, so the reported weekly sales do not necessarily add to cumulative sales.

Current sales do not include nonstorable grain or grain destined for export.

Soybean prices compared with market value of soybean oil and meal

	Unit of value	June 2/ 1963	May 1963	April 1963	June 1962
Soybean Oil:					
Average price at crushing plant .....	Cents per lb.	9.0	9.2	9.0	8.4
Value from bushel of soybeans 1/.....	Dollars	0.96	0.98	0.96	0.92
Soybean Meal, 44%:					
Bulk price at Decatur .....	Dollars per ton	70.35	68.10	68.40	66.30
Value from bushel of soybeans 1/.....	Dollars	1.65	1.60	1.61	1.56
Value of oil and meal from bushel of soybeans 1/.....	Dollars	2.61	2.58	2.57	2.48
Market price of No. 1 yellow soybeans at Illinois points .....	Dollars per bu.	2.57	2.56	2.55	2.44
Spread between soybean price and value of oil and meal .....	Cents	4	2	2	4

1/ Based on assumption that a bushel of soybeans yields 10.7 pounds of oil and 47.0 pounds of meal for 1962-63. 2/ Preliminary.

NOTE: This table is for statistical comparison only. It does not reflect actual operating margins since prices are simple averages and do not take into account location differentials or actual purchases and sales of soybeans, soybean oil or soybean meal.

The following export payment rates applicable to all destinations, pursuant to the Terms and Conditions of Wheat and Flour Export Programs, GR-345 and GR-346, apply from 3:31 p.m. June 27, to 3:30 p.m., e.d.t. June 28, 1963.

WHEAT RATES (Cents per bushel)

Export Areas	Hard Red Spring	Durum	Hard Red Winter	Other Classes 1/
	Export Rate Periods			
	Thru Aug. 15, 1963	Thru Aug. 15, 1963	Thru Dec. 31, 1963	Thru Dec. 31, 1963
<u>EAST COAST</u> (Including St. Lawrence and Great Lakes ports)...	61	55	44	44
<u>GULF COAST</u> .....	61	55	44	44
	Other Classes 1/ 2/			
	Thru Aug. 15, 1963	Thru Aug. 15, 1963	Thru Dec. 31, 1963	Thru Dec. 31, 1963
